FW 2627**

Bringing world class gear to active people and professional athletes who thrive in winter.

For decades, our unique products have played a key role in the success of top winter sport athletes. At the same time, we've helped countless enthusiasts elevate their skiing experience. We've applied our innovation and expertise to create high-performance products for all seasons. We strive to surprise and lead by doing things a little differently.

With our products, you'll ski faster, perform better and reach your goals.

We embrace every condition - freezing temperatures, the warm spring sun, fresh snow, wet snow, easter snow and powder skiing. We love steep mountain slopes and fresh XC tracks. We embrace the rain, wind, and sweat. We love pushing our limits and feeling the satisfaction of a tough workout well done.

Our Racing Service

Swix Racing Service is at the heart of the action, following the entire World Cup circuit and major championships in alpine skiing, biathlon, and Nordic disciplines. Our presence extends from the global stage to local events, with dedicated national and local racing service teams.

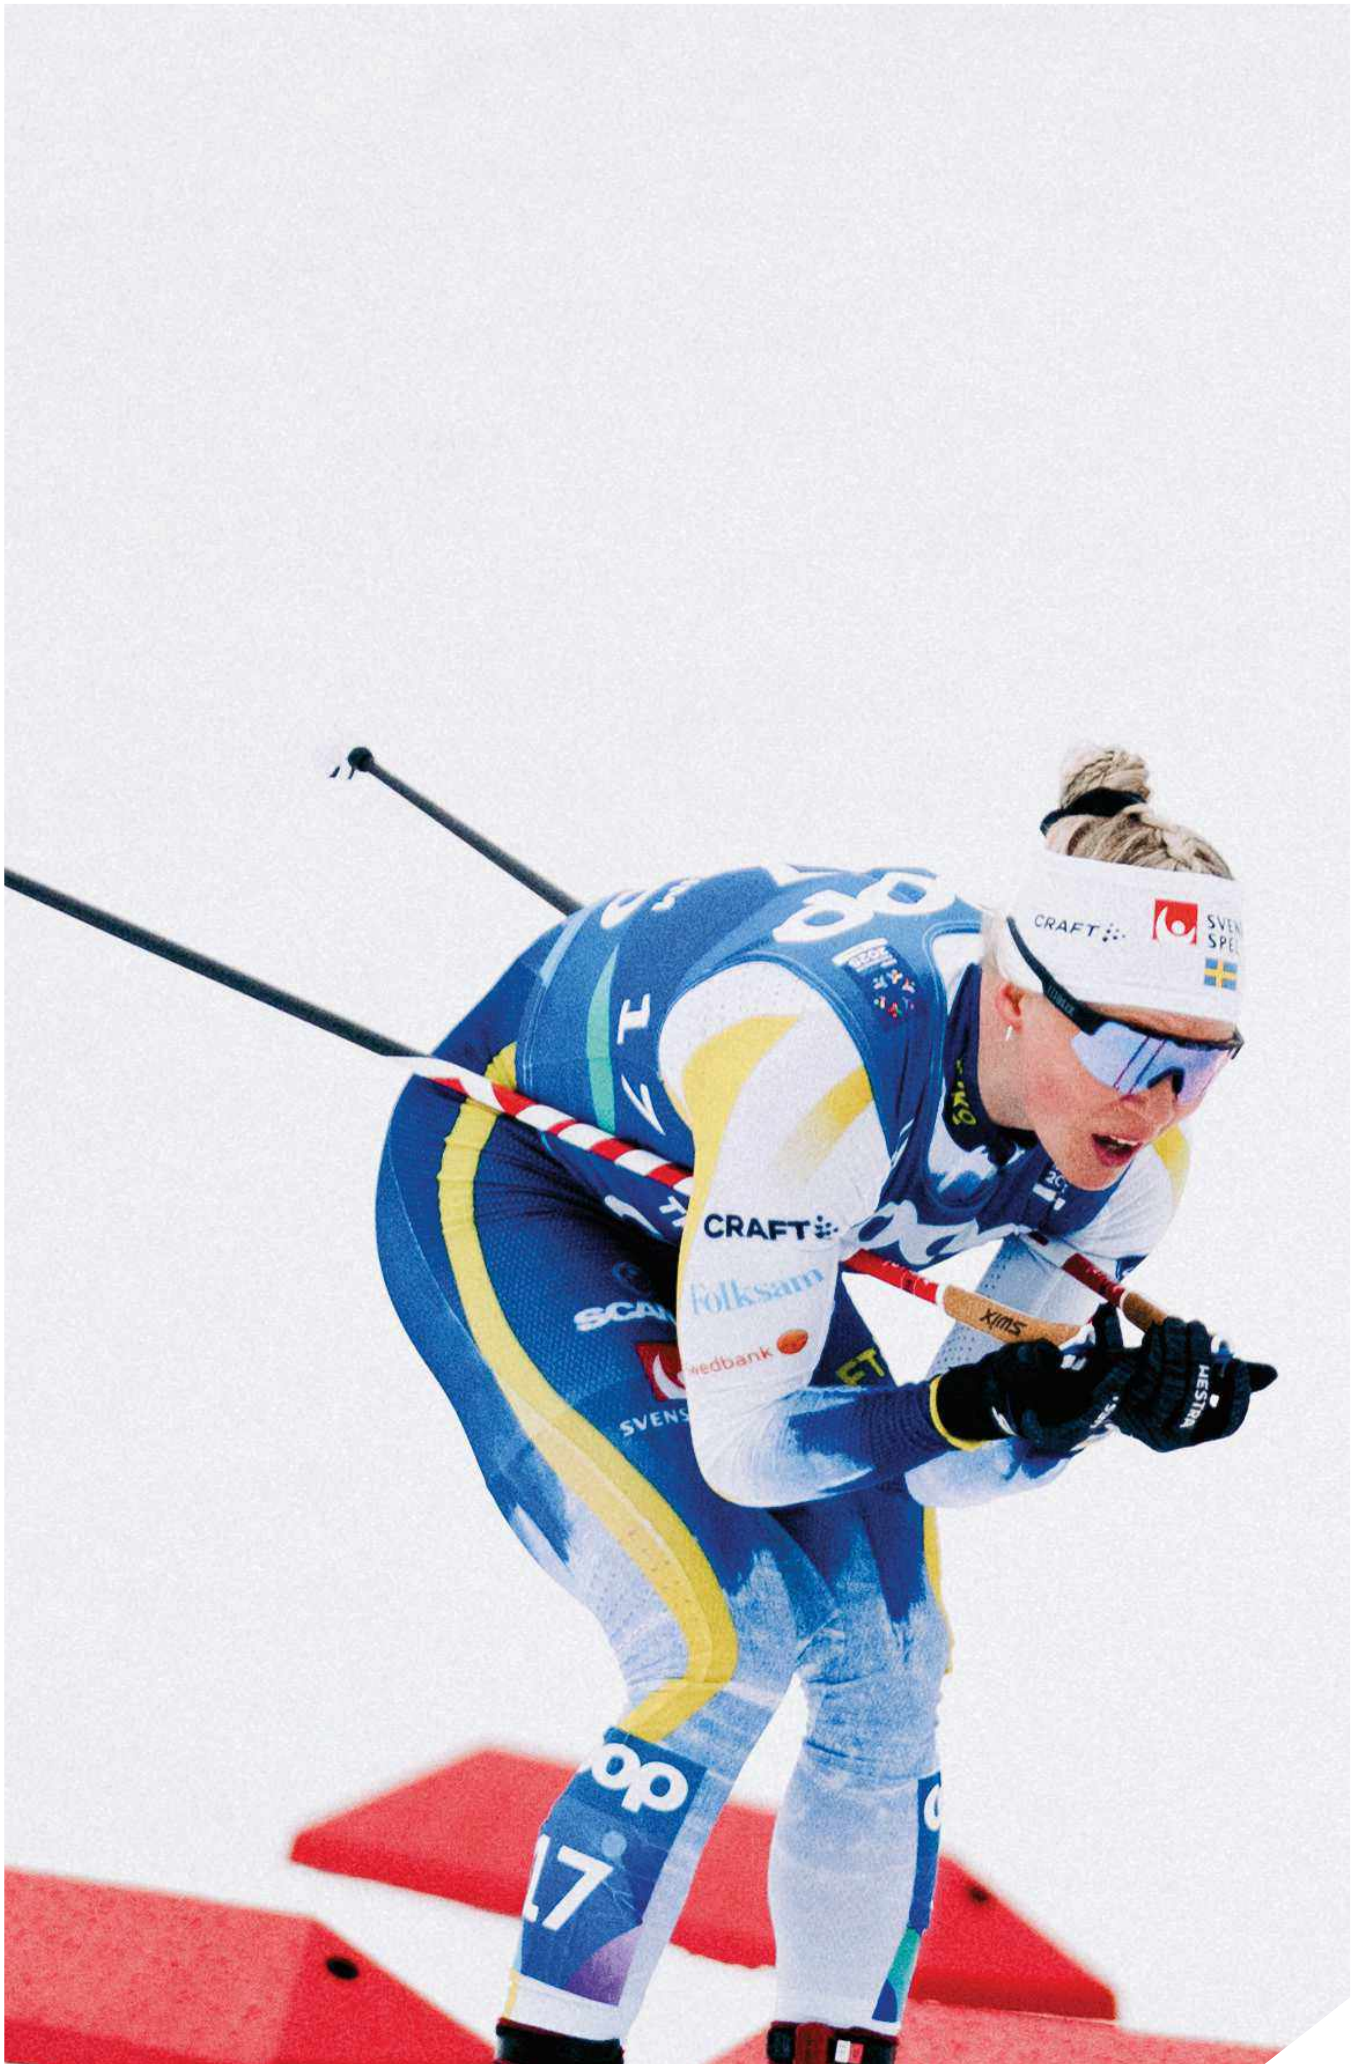

Every winter, our racing service team tests and fine-tunes the very best products, ensuring peak performance at ski competitions worldwide. We don't just focus on today – we're constantly pushing the boundaries by testing future products. Working closely with our R&D department, elite athletes, and national teams across various disciplines, we relentlessly pursue innovation to develop new and enhanced products.

By the time our new products hit the market, they've been through rigorous testing and proven themselves on some of the most challenging courses. Over the course of a season, we carry out hundreds of tests and cover thousands of kilometers on skis – all in the pursuit of perfection.

See you in the tracks!

All the best,

Morten Sætha,
Swix Racing Service

Waxes

Ski wax is more than glide – it's key to optimal performance. At Swix, we innovate, developing waxes that handle all snow conditions, from wet snow to icy tracks. Our products provide precision, control, and speed through cutting-edge research and rigorous testing.

Whether you're a competitive athlete or an enthusiast, Swix Ski wax helps you perform at your best.

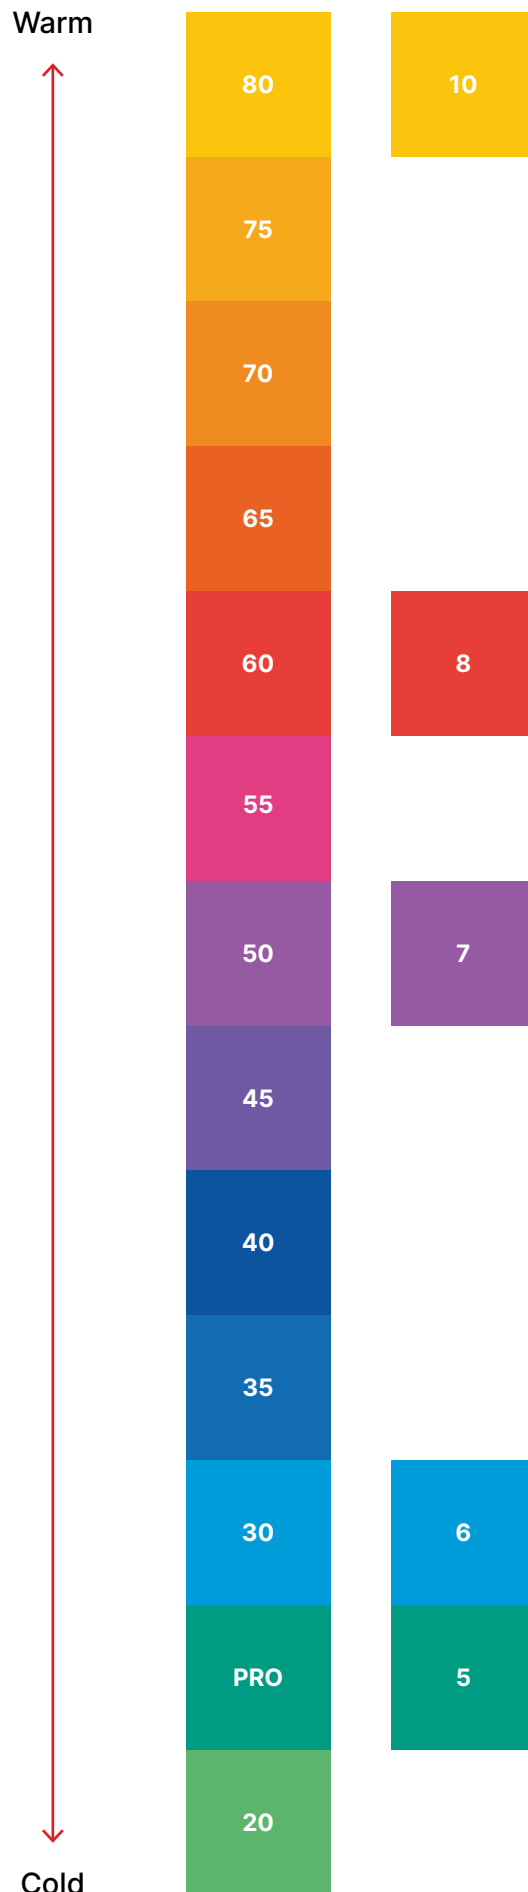

Kick Wax - New Temperature Scale

Our wax system has gotten a fresh look. Those familiar colors? They're still there, but we've tweaked the spectrum for clarity and a improved designsystem.

From the chilliest colds to milder temperatures, lower numbers still signal cooler conditions. Whether you're diving into our glide or grip collections, the shades remain your trusted guide.

And for those wondering: Our Blue Extra is still proudly blue. This refined scale just aims to make your choice even more straightforward, helping you find your perfect match for every snowy adventure.

Kicking the New Design

Every ski enthusiast recognizes it: our iconic V-series retains its cherished design with just a hint of refinement.

As for VP, our competition grip wax series? It remains in its signature black, but now with familiar color cues on the packaging. All to make your wax selection, based on temperature and conditions, that is much more intuitive.

World Cup

The Swix World Cup line represents the forefront of ski wax innovation, developed in close collaboration with top athletes and technicians across all skiing and snowboard disciplines.

The groundbreaking World Cup line also features a unique molybdenum-infused powder, specifically designed for extreme conditions like abrasive, dirty, or wet snow. Ideal as a base layer in soft conditions or as a top-coat in harder snow, ensuring durability and optimal glide in the toughest conditions.

The **Swix World Cup** system marks a major leap forward in ski wax technology, setting new standards for racers and enthusiasts who demand top-tier performance.

DH and DHB Gliders.

These World Cup racing gliders are particularly developed and thoroughly tested for the accelerations, high speeds, immense forces, and long gliding stretches of the alpine speed disciplines, Super-G and Downhill.

Top-Finish Powders and Liquids.

PF powders: Designed for new, fine-grained snow, these powders ensure maximum glide.

PC powders: Engineered for coarse-grained, transformed snow, delivering superior performance.

LF35 Liquid: Specifically made for fine new snow, offering added versatility.

LFC100 Liquid: Works well in moist, fine new, and coarse transformed snow when the snow humidity is above 25%.

LC100 Liquid: The fastest top-finish liquid for very wet conditions and coarse-grained snow.

**LF35 World Cup Liquid
Fine Mid**

LF35-25-50 50 ml / 1.69 oz 1 pcs

-4° → 4°C / 25° → 39°F
Snow Humidity: 20-35% - Mid
Top-Finish Liquid - Fine
Ski and Snowboard Wax

The World Cup LF35 top-finish liquid offers excellent glide in new, fine snow conditions on both sides of the freezing level. LF35 utilizes the Swix Lotus technology to create a super smooth, hydrophobic, fast coating that minimizes the contact area between the ski base and medium-dry, new snow particles. PF35 performs best on medium-dry snow with a humidity between 20% and 35%.

**LFC100 World Cup Liquid
Fine Coarse Wet**

LFC100-25-50 50 ml / 1.69 oz 1 pcs

-5° → 10°C / 23° → 50°F
Snow Humidity: 25-100% - Wet
Top-Finish Liquid - Fine & Coarse
Ski and Snowboard Wax

The Swix AmphiGlide technology enables the LFC100 to utilize the moisture in the snow as lubrication while repelling water and other greasy contaminants. The LFC100 excels in wet snow with humidity above 25% and handles dirty conditions very well.

**LC100 World Cup Liquid
Coarse Very Wet**

LC100-26-50 50 ml / 1.69 oz 1 pcs

0° → 10°C / 32° → 50°F
now Humidity: 30-100% - Very Wet
Top-Finish Liquid - Coarse
Ski and Snowboard Wax

The latest innovation from Swix R&D department guarantees the fastest glide, the ultimate dirt repellency and great durability on coarse snow, when you are racing on water, slush or otherwise really wet conditions. Works well on salted slush. These conditions you often find in the early and late season and especially in middle Europe.

Like all World Cup top coats, LC100 Liquid has went thru intensive test routine. Hundreds of test recipes and thousands of performance tests. Just to bring that winning margin!

**PC25 World Cup Powder
Coarse Dry**

PC25-25-20 20 g / 0.7 oz 1 pcs

-20° → -4°C / -4° → 25°F
 Snow Humidity: 0-25% - Dry
 Top-Finish Powder - Coarse
 Minimum iron temp.: 160°C (320°F)

**PC35 World Cup Powder
Coarse Mid**

PC35-25-20 20 g / 0.7 oz 1 pcs

-10° → 2°C / 14° → 36°F
 Snow Humidity: 20-35% - Mid
 Top-Finish Powder - Coarse
 Minimum iron temp.: 160°C (320°F)

**PC100 World Cup Powder
Coarse Wet**

PC100-25-20 20 g / 0.7 oz 1 pcs

-2° → 10°C / 28° → 50°F
 Snow Humidity: 30-100% - Wet
 Top-Finish Powder - Coarse
 Minimum iron temp.: 140°C (284°F)

The World Cup PC powders are top-finish powders for coarse, transformed snow conditions. They utilize the Swix Nano Contact technology to create a special nano-structured coating that minimizes the contact area between the ski base and coarse, transformed snow particles.

**PF25 World Cup Powder
Fine Dry**

PF25-25-20 20 g / 0.7 oz 1 pcs

-20° → -2°C / -4° → 28°F
 Snow Humidity: 0-25% - Dry
 Top-Finish Powder - Fine
 Minimum iron temp.: 160°C (320°F)

**PF35 World Cup Powder
Fine Mid**

PF35-25-20 20 g / 0.7 oz 1 pcs

-8° → 0°C / 18° → 32°F
 Snow Humidity: 20-35% - Mid
 Top-Finish Powder - Fine
 Minimum iron temp.: 160°C (320°F)

**PF100 World Cup Powder
Fine Wet**

PF100-25-20 20 g / 0.7 oz 1 pcs

-4° → 4°C / 25° → 39°F
 Snow Humidity: 25-100% - Wet
 Top-Finish Powder - Fine
 Minimum iron temp.: 130°C (266°F)

The World Cup PF powders are top-finish products for fine, new snow conditions. They utilize the Swix CrystalShield technology to create a tough, smooth, and fast coating that minimizes the contact area between the ski base and fine, new snow particles.

New

New

New

DH6 World Cup Racing Wax

DH06-26-180 180 g / 6.3 oz 1 pcs

-12° → -5°C / 10° → 23°F

Ski and snowboard racing wax for all snow types

Minimum iron temp.: 145°C (293°F)

DH7 World Cup Racing Wax

DH07-26-180 180 g / 6.3 oz 1 pcs

-8° → -2°C / 18° → 28°F

Ski and snowboard racing wax for all snow types

Minimum iron temp.: 140°C (284°F)

DH7B World Cup Racing Wax

DH07B-26-180 180 g / 6.3 oz 1 pcs

-8° → -2°C / 18° → 28°F

Ski and snowboard racing wax for all snow types

Minimum iron temp.: 140°C (284°F)

These World Cup racing gliders are particularly developed and thoroughly tested for the accelerations, high speeds, immense forces, and long gliding stretches of the alpine speed disciplines, Super-G and Downhill

PM World Cup Powder Molybdenum

PM-25-20 20 g / 0.7 oz 1 pcs

-30° → 10°C / -22° → 50°F

For Extreme Snow Conditions

Molybdenum Racing Powder

Minimum iron temp.: 160°C (320°F)

The World Cup PM powder is a special black top-finish powder for extremely abrasive snow conditions. It performs great in very cold and dry snow but is often competitive also in very coarse and wet conditions. The PM powder utilizes Molybdenum as a solid lubrication additive to offer low friction, even in extremely abrasive skiing conditions. It performs great on dry, medium-dry, and wet snow.

Marathon

We have developed Marathon to keep the excellent glide over longer distances. These waxes have for several years been the preferred wax for long-distance races like Birkebeinerrennet, Vasaloppet, and Marcialonga.

They perform well even when the temperatures and snow vary throughout the race course. Marathon is also well suited for long days in the alpine resorts and extended backcountry ski trips.

**DHFF-4
Marathon White Wax**

DHFF-4 40 g / 1.4 oz 1 pcs

Extra durable Racing Wax for all Skis & Snowboards
Recommended iron temp: 155°C (311°F)

A hard and extra durable glide wax for long distance racing. Developed especially for longer distances in newer and clean snow. Great in warmer conditions, but often competitive also in colder weather.

The speed of the iron should be approx. 8-10 sec. on a skating ski. The wax can be re-heated after cooling to room temperature (10 min) for better durability. Scraping after approx. one minute. Important to have a good iron to get an efficient melting of the wax.

Marathon waxes can be used as a race wax alone or as a base for top coats.

**DHP-25-25
Marathon White Powder**

DHP-25-25 25 g / 0.9 oz 1 pcs

Extra durable Racing Powder for all Skis & Snowboards
Recommended iron temp: 160°C (320°F)

**DHL-25-80
Marathon Liquid**

DHL-25-80 80 ml / 2.7 oz 1 pcs

Extra Durable Racing Liquid for all skis and snowboards
All temperatures

Marathon Liquid is a special top-finish liquid for long-distance racing. It is developed especially for longer distances in newer and clean snow. It is excellent in warmer conditions but often competitive also in colder weather.

Apply an even layer using the sponge applicator and let it dry. Work the Marathon liquid into the base using the T18F-2 roto fleece for optimal results. Polish thoroughly with the T17W blue nylon roto brush. For extra glide and durability, repeat the process two times.

**DHB-24-4
Marathon Black Wax**

DHB-24-4 40 g / 1.4 oz 1 pcs

Extra durable Racing Wax for all Skis & Snowboards
Recommended iron temp: 155°C (311°F)

A hard and extra durable glide wax with additive for long distance racing. Developed especially for wet dirty contaminated snow. The additive is reducing friction against dirt particles. Great in warmer conditions, but often competitive also in colder weather.

The speed of the iron should be approx. 8-10 sec. on a skating ski. The wax can be re-heated after cooling to room temperature (10 min) for better durability. Scraping after approx. one minute. Important to have a good iron to get an efficient melting of the wax.

Marathon waxes can be used as a race wax alone or as a base for top coats. NB! For FW24/25 Marathon Black has a new and improved recipe.

**DHPB-25-25
Marathon Black Powder**

DHPB-25-25 25 g / 0.9 oz 1 pcs

Extra durable Racing Powder for all Skis & Snowboards
Recommended iron temp: 160°C (320°F)

TSP Powder

The TSP series are great powders for competition that work well in fresh, old or man made snow.

The speed of the iron should be approx. 8-10 sec. on a skating ski. Important to get an efficient melting of the powder.

TSP5 Turquoise

TSP05-4 40 g / 1.4 oz 1 pcs

-18° → -10°C / 0° → 14°F
Recommended iron temp: 160°C (320°F)

TSP5 is the hardest powder in the TSP line, and a great choice in cold conditions, both for alpine and cross country. It is loved by servicemen, due to its great durability and dry friction properties. It is made as a powder to make it easier to apply, without sacrificing the great glide properties. For fresh, old or artificial snow. The speed of the iron should be approx. 8-10 sec. on a skating ski. Important to have a good iron to get an efficient melting of the powder. TSP5 can be used as a race powder alone or as a base for top coats.

TSP6 Blue

TSP06-4 40 g / 1.4 oz 1 pcs

-12° → -6°C / 10° → 21°F
Recommended iron temp: 160°C (320°F)

TSP6 is a very good powder for both alpine and cross country, which has shown great performance on artificial snow in addition to natural snow. The speed of the iron should be approx. 8-10 sec. on a skating ski. Important to have a good iron to get an efficient melting of the powder. TSP6 can be used as a race powder alone, or as base for top coats.

TSP7 Violet

TSP07-4 40 g / 1.4 oz 1 pcs

-8° → -2°C / 18° → 28°F
Recommended iron temp: 160°C (320°F)

TSP7 is a versatile powder suited for normal winter conditions below the freezing point. Powder makes it convenient to work with and easy to get a good end-result. For fresh, old or man made snow. Good in clean snow. The speed of the iron should be approx. 8-10 sec. on a skating ski. It is important to have a good iron to get an efficient melting of the powder. TSP7 can be used as a race powder alone or as a base for top coats.

TSP8 Red

TSP08-4 40 g / 1.4 oz 1 pcs

-4° → +4°C / 25° → 39°F
Recommended iron temp: 160°C (320°F)

TSP8 has a softness and racing formula that makes it perfect in conditions on both sides of the freezing point. The speed of the iron should be approx. 8-10 sec. on a skating ski. It's important to have a good iron to get an efficient melting of the powder. TSP8 can be used as a race powder alone, but is often used as a base for top coats.

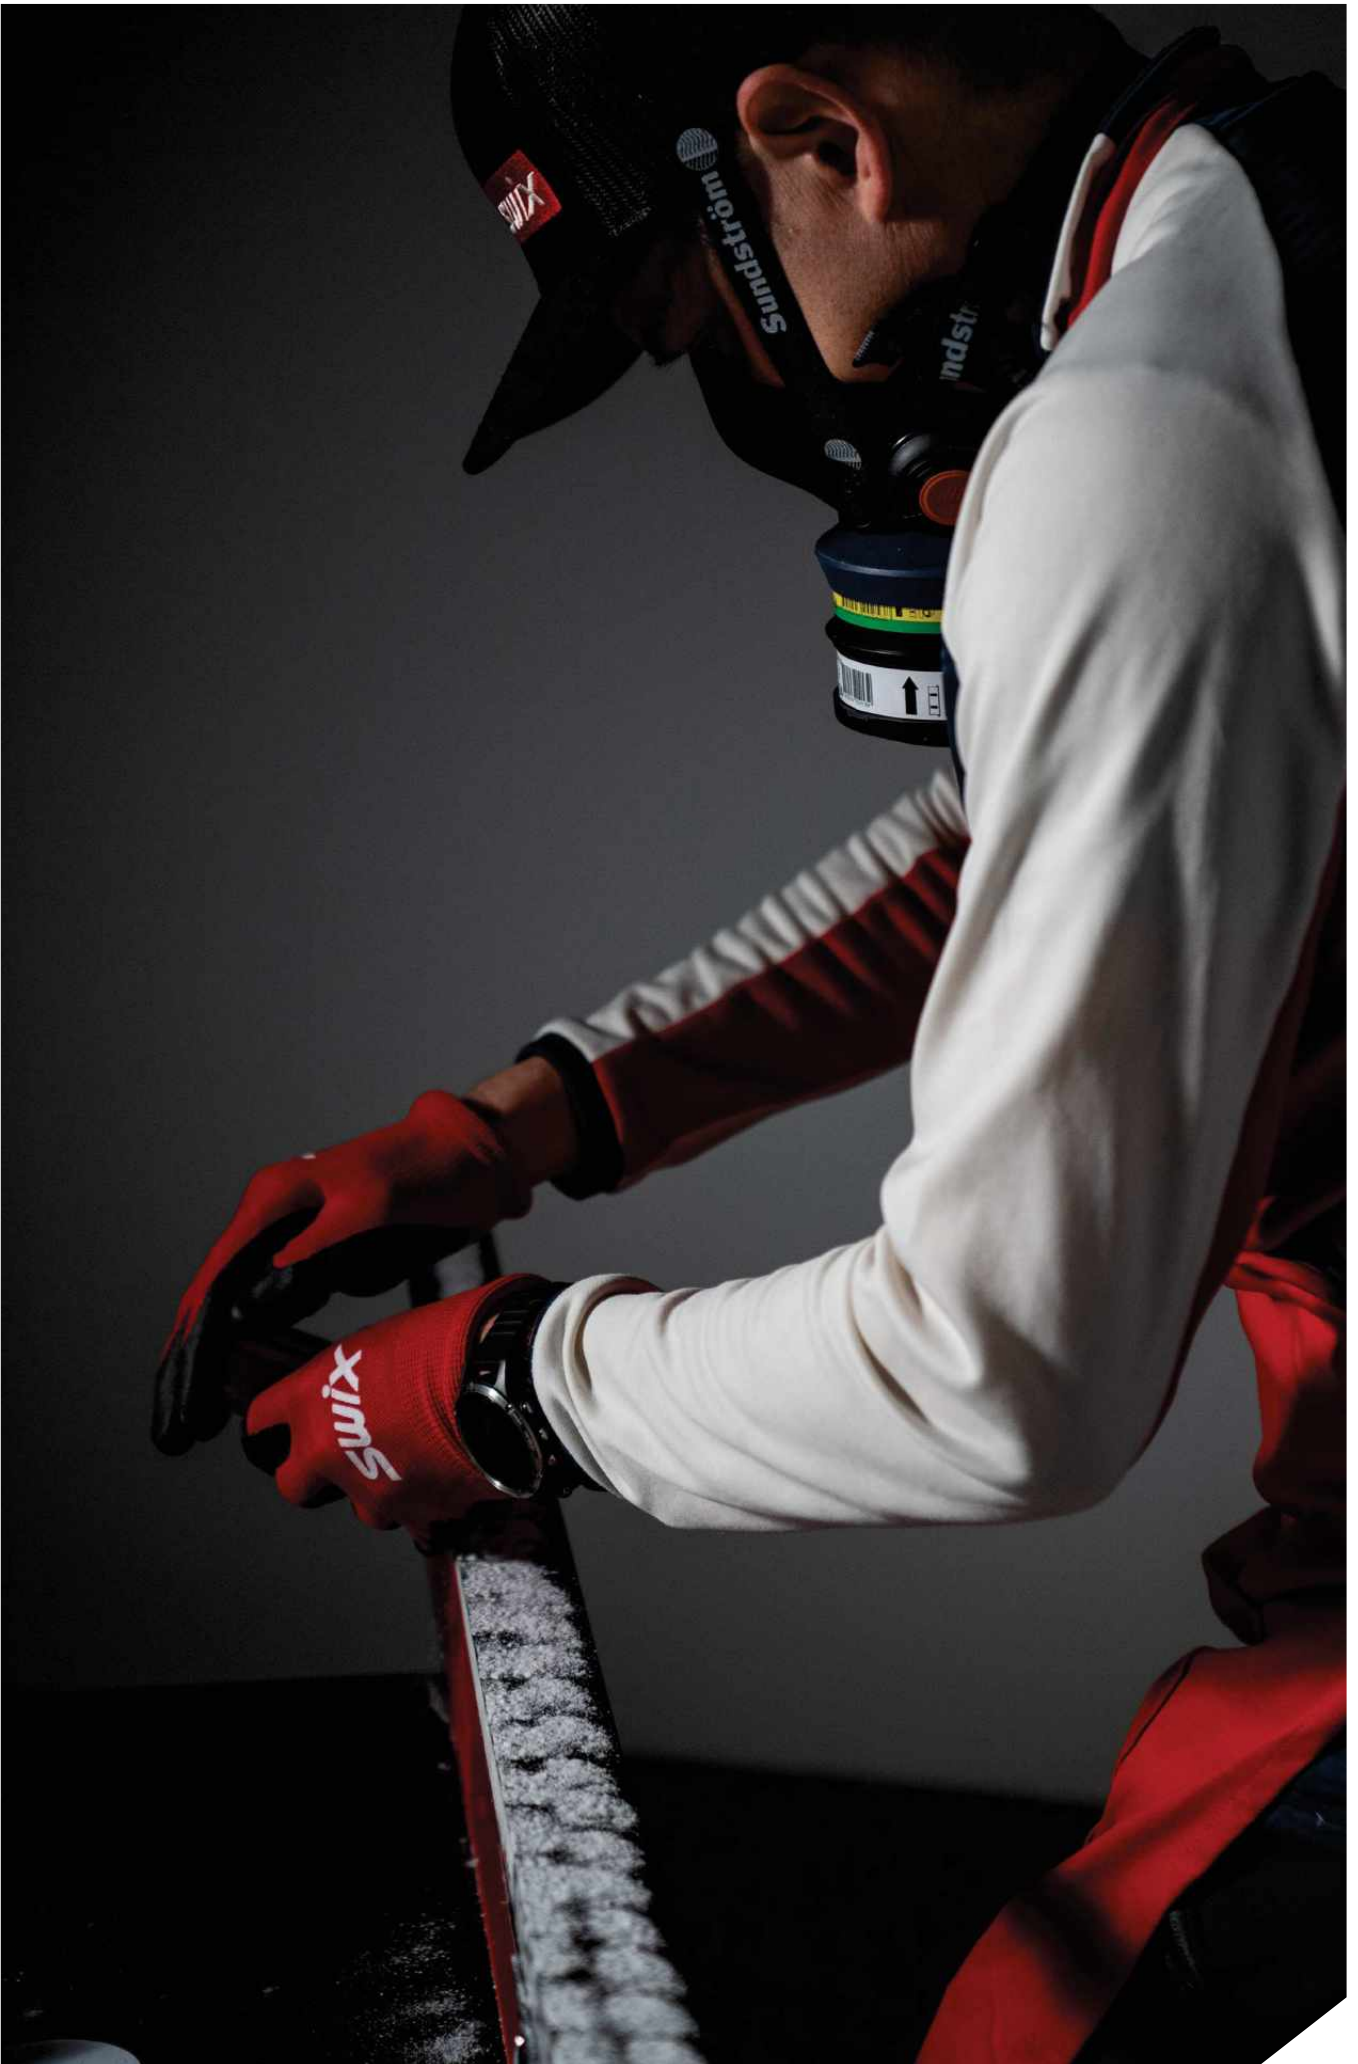

TSP10 Yellow

TSP10-4 40 g / 1.4 oz 1 pcs

0° → +10°C / 32° → 50°F
Recommended iron temp: 160°C (320°F)

TSP10 is made harder than the standard for a 10 wax. The adjusted hardness makes the wax more durable and absorbs less dirt. The solid lubricant additive reduces the friction in contaminated snow. Excellent results in artificial snow as well as natural transformed older snow, especially noticeable when used alone.

HS Hard Wax

The HS series are great gliders for training and competition with very good glide properties.

The speed of the iron should be approx. 8-10 sec. on a skating ski. The wax can be re-heated after cooling to room temperature (10 min.) for better durability. Scraping after approx. one minute.

Important to have a good iron to get an efficient melting of the wax.

HS 5 Turquoise

HS05-6	60 g / 2.1 oz	10 pcs
HS05-18	180 g / 6.3 oz	10 pcs
HS05-90	900 g / 31.5 oz	1 pcs

-18° → -10°C / 0° → 14°F

Recommended iron temp: 160°C (320°F)

HS5 is the hardest wax in the HS line, and is a great choice in cold conditions, due to its great durability and dry friction properties. It's a great choice both for alpine and cross country. Despite being a wax for cold conditions, the melting point makes it easier to apply than many competitors in this area, without sacrificing the great gliding properties. For fresh, old or artificial snow.

HS 6 Blue

HS06-6	60 g / 2.1 oz	10 pcs
HS06-18	180 g / 6.3 oz	10 pcs
HS06-90	900 g / 31.5 oz	1 pcs

-12° → -6°C / 10° → 21°F

Recommended iron temp: 155°C (311°F)

HS6 is very versatile. Its area of use stretches from underlayer for powder to racing wax and base prep wax for cold skis. HS6 has a good durability and offers great performance on natural and artificial snow. PS6 is now available also as pellets for easy filling of waxing machines. PS06W-26-1000 is white, but other than that, everything is the same as the good old PS6.

HS 6 Blue

HS07-6	60 g / 2.1 oz	10 pcs
HS07-18	180 g / 6.3 oz	10 pcs
HS07-90	900 g / 31.5 oz	1 pcs

-8° → -2°C / 18° → 28°F

Recommended iron temp: 150°C (302°F)

HS7 performs great in normal winter conditions below the freezing point. Its hardness makes it convenient to work with and easy to get a good end-result. Can be used as a racing wax at low air humidity, but will also serve the purpose as a brilliant training wax.

HS 8 Red

HS08-6	60 g / 2.1 oz	10 pcs
HS08-18	180 g / 6.3 oz	10 pcs
HS08-90	900 g / 31.5 oz	1 pcs

-4° → 4°C / 25° → 39°F

Recommended iron temp: 150°C (302°F)

HS8 is a great wax for both base-prep and training. It can also be used as a race wax, preferably used with a top coat. Easy to melt and very convenient to work with.

HS 10 Yellow

HS10-6	60 g / 2.1 oz	10 pcs
HS10-18	180 g / 6.3 oz	10 pcs
HS10-90	900 g / 31.5 oz	1 pcs

0° → 10°C / 32° → 50°F

Recommended iron temp: 150°C (302°F)

HS10 is a great base prep wax, but also a great training wax. Ideal in warm conditions, typically during spring skiing.

HS Liquid Spray

Great liquid gliders that are very durable.

Quick and easy to apply. Developed together with our World Cup Racing Service Team, with impressive test results.

Recommended for ambitious citizen racers, dedicated enthusiasts and recreational skiers.

HS6 Liquid Blue

HS06L-125 125 ml / 4.2 oz 6 pcs

-12° → -4°C / 10° → 25°F

HS6L is especially developed for cold conditions, down to -12°C (10°F). Below this point liquids are normally outperformed by traditional paraffin waxes. HS6L is a versatile wax that works in all snow conditions, but performs at its best when the humidity is high.

HS7 Liquid Violet

HS07L-125 125 ml / 4.2 oz 6 pcs

-8° → -2°C / 18° → 28°F

HS7L performs at its best when typical winter conditions below the freezing point. Can handle various snow conditions and is not humidity sensitive. A safe choice that rarely underperform within its core area of use.

HS8 Liquid RED

HS08L-125 125 ml / 4.2 oz 6 pcs

-4° → 4°C / 25° → 39°F

HS8L is an extremely versatile wax on both sides of the freezing point with exceptional feedback from racing. It performs in older snow below freezing, new falling snow above freezing and everything between. Basically a must have in conditions you will meet often.

HS10 Liquid Yellow

HS10L-125 125 ml / 4.2 oz 6 pcs

2° → 10°C / 36° → 50°F

HS10L is a wax for very wet conditions when the snow has turned transformed. Ideal for spring skiing when the dirt content typically is high, as HS10L collect less pollution from the snow than comparable paraffin waxes. A great choice in warm weather that never underperforms.

PS Hard Wax

The PS series are great gliders for training and competition with good glide properties.

The speed of the iron should be approx. 8-10 sec. on a skating ski. The wax can be re-heated after cooling to room temperature (10 min.) for better durability. Scraping after approx. one minute.

Important to have a good iron to get an efficient melting of the wax.

HS 5 Turquoise

HS05-6	60 g / 2.1 oz	10 pcs
HS05-18	180 g / 6.3 oz	10 pcs
HS05-90	900 g / 31.5 oz	1 pcs

-18° → -10°C / 0° → 14°F

Recommended iron temp: 160°C (320°F)

PS5 is the hardest wax in the line, and is a great choice in cold conditions, due to its great durability and dry friction properties. It's a great choice both for alpine and cross country. Despite being a wax for cold conditions, the melting point makes it easier to apply than many competitors in this area, without sacrificing the great glide properties. For fresh, old or artificial snow.

PS 6 Blue

PS06-6	60 g / 2.1 oz	10 pcs
PS06-18	180 g / 6.3 oz	10 pcs
PS06-90	900 g / 31.5 oz	1 pcs
PS06W-26-1000	1000g / 33.8 oz	1 pcs

-12° → -6°C / 10° → 21°F

Recommended iron temp: 145°C (293°F)

PS6 is very versatile. Its area of use stretches from base for powder to racing wax and base prep wax for cold skis. PS6 has a good durability and offers great performance on natural and artificial snow.

PS 7 Violet

PS07-6	60 g / 2.1 oz	10 pcs
PS07-18	180 g / 6.3 oz	10 pcs
PS07-90	900 g / 31.5 oz	1 pcs

-8° → -2°C / 18° → 28°F

Recommended iron temp: 140°C (284°F)

PS7 is a wax that performs great in normal winter conditions below the freezing point. Its hardness makes it convenient to work with and easy to get a good end result. PS7 is an economic training and racing wax as well as an all round base prep wax.

PS 8 Red

PS08-6	60 g / 2.1 oz	10 pcs
PS08-18	180 g / 6.3 oz	10 pcs
PS08-90	900 g / 31.5 oz	1 pcs

-4° → 4°C / 25° → 39°F

Recommended iron temp: 130°C (266°F)

PS8 is an economic training and racing wax as well as base prep wax for warm skis. Easy to melt and very convenient to work with.

PS 10 Yellow

PS10-6	60 g / 2.1 oz	10 pcs
PS10-18	180 g / 6.3 oz	10 pcs
PS10-90	900 g / 31.5 oz	1 pcs

0° → 10°C / 32° → 50°F

Recommended iron temp: 120°C (248°F)

PS10 is an economic training and racing wax as well as base prep wax for warm skis. Easy to melt and very convenient to work with.

PS Liquid

Our PS Liquid is an easy to use glide wax for training sessions and recreational skiing.

80ml bottle – for cross country skis

These liquid gliders don't require using waxing iron or any type of heat. The 80 ml bottle comes with sponge applicator for easy application on cross country skis.

250ml bottle – for alpine skis

The 250 ml bottle has a wide opening for easy application on alpine skis. The liquid wax in the 250ml version is also a notch thicker and gives improved durability and base protection for long days carving on the edges in the alpine resorts.

The glide and durability of both versions are improved by rubbing the wax into the base with a cork and then polishing with a soft nylon brush.

PS6 Liquid Blue

PS06L-80	80 ml / 2.7 oz	15 pcs
PS06L-250	250 ml / 8.45 oz	10 pcs

-12° → -6°C / 10° → 21°F

PS6 liquid is a very versatile liquid glide wax. PS6 liquid provides good durability and excellent glide on natural and artificial snow. PS6 can be used as a racing wax alone or as a base wax for final wax layers.

PS7 Liquid Violet

PS07L-80	80 ml / 2.7 oz	15 pcs
PS07L-250	250 ml / 8.45 oz	10 pcs

-8° → -2°C / 18° → 28°F

PS7 liquid is a very versatile liquid glide wax. PS7 liquid provides good durability and excellent glide on natural and artificial snow. PS7 can be used as a racing wax alone or as a base wax for final wax layers.

PS8 Liquid Red

PS08L-80	80 ml / 2.7 oz	15 pcs
PS08L-250	250 ml / 8.45 oz	10 pcs

-4° → -4°C / 25° → 39°F

PS8 liquid is a very versatile liquid glide wax. PS8 liquid provides good durability and excellent glide on fine grained snow. PS8 can be used as a racing wax alone or as a base wax for final wax layers.

PS10 Liquid Yellow

PS10L-80	80 ml / 2.7 oz	15 pcs
PS10L-250	250 ml / 8.45 oz	10 pcs

0° → 10°C / 32° → 50°F

PS10 liquid is a very versatile liquid glide wax. It provides good durability and excellent glide on fine grained snow. PS10 can be used as a racing wax alone or as a base wax for final wax layers.

BP Base Prep

Special base glide waxes for a racing and performance oriented level.

Base prep waxes should be used as prep wax before applying wax of the day.

BASE Prep Cold

BP077-180	180 ml / 6.3 oz	10 pcs
BP077-900	900 ml / 31.5 oz	1 pcs

Recommended iron temp: 135°C (275°F)

A harder Baseprep for new DH, GS and SL skis used for all conditions. Can also be used for glacier training. The wax is easy to work with and gives the ski bases a nice looking finish.

BASE Prep Cold

BP077-180	180 ml / 6.3 oz	10 pcs
BP077-900	900 ml / 31.5 oz	1 pcs

Recommended iron temp: 135°C (275°F)

Normal. For normal winter conditions, -10°C to 0°C (14°F to 32°F). The All Round Base Prep wax for most skis/boards. Used on new skis and as travel wax.

BASE Prep Warm

BP099-18	180 ml / 6.3 oz	10 pcs
BP099-900	900 ml / 31.5 oz	1 pcs

Recommended iron temp: 110°C (230°F)

Soft wax with low melting point. Recommended as the first wax on all new skis to make the base accustomed to hot irons.

BP99 is also recommended for skis or boards in the "Hot Box". The temperature in the Hot Box should never be higher than 55°C/130°F. Higher temps than 55°C in the hot box can cause delamination of the base.

BASE Protection Liquid

BPL-80	80 ml / 2.7 oz	15 pcs
BPL-500	500 ml / 16.9 oz	1 pcs

Liquid transportation wax. Leaves a thin layer of wax when the solvent evaporates.

80 ml. bottle with sponge applicator for easy application.

500 ml. bottle can be used as a refill station for BPL-80.

F4 Easy Glide

Better skis, better speed...
Easy to apply products for all types of skiing
& snowboarding.

**F4
Glidewax Liquid**

F4-23-100	100 ml / 3.38 oz	21 pcs
F4-23-250	250 ml / 8.45 oz	10 pcs

F4-23-100 has a sponge foam applicator on one side of the bottle for applying wax, and a felt pad on the other side for polishing. A handy pocket-size.

F4-23-250 comes in a bottle with a wide opening for easy application on alpine ski.

Apply a thin layer over the base surface. Let it dry for approx. 2 minutes. Finish by polishing with the felt pad. Apply F4 to the steel edges when storing your skis or board after the season. This prevents the edges rusting.

**F4
Glidewax**

F4-23-180	180 ml / 3.38 oz	10 pcs
F4-23-900	900 ml / 8.45 oz	1 pcs

F4-23-180 and F4-23-900 is intended for heat application with a waxing iron. The temperature of the waxing iron is 130°C. Scrape off excess wax with plexi scraper T0823D and finish off with combi brush T0159B.

**F4
Glidewax Aerosol**

F4-23-150	150 ml / 5 oz	10 pcs
-----------	---------------	--------

F4-23-150 has a sponge foam applicator for wax application. Apply a thin layer over the base. Let it dry for approx. 5 minutes. Finish by polishing with Fiberlene T0151 or Nylon Brush T0166B. Apply F4 to the metal edges before storing your skis or board after the season.

**F4
Glidewax Paste**

F4-23-75	75 ml / 2.54 oz	20 pcs
----------	-----------------	--------

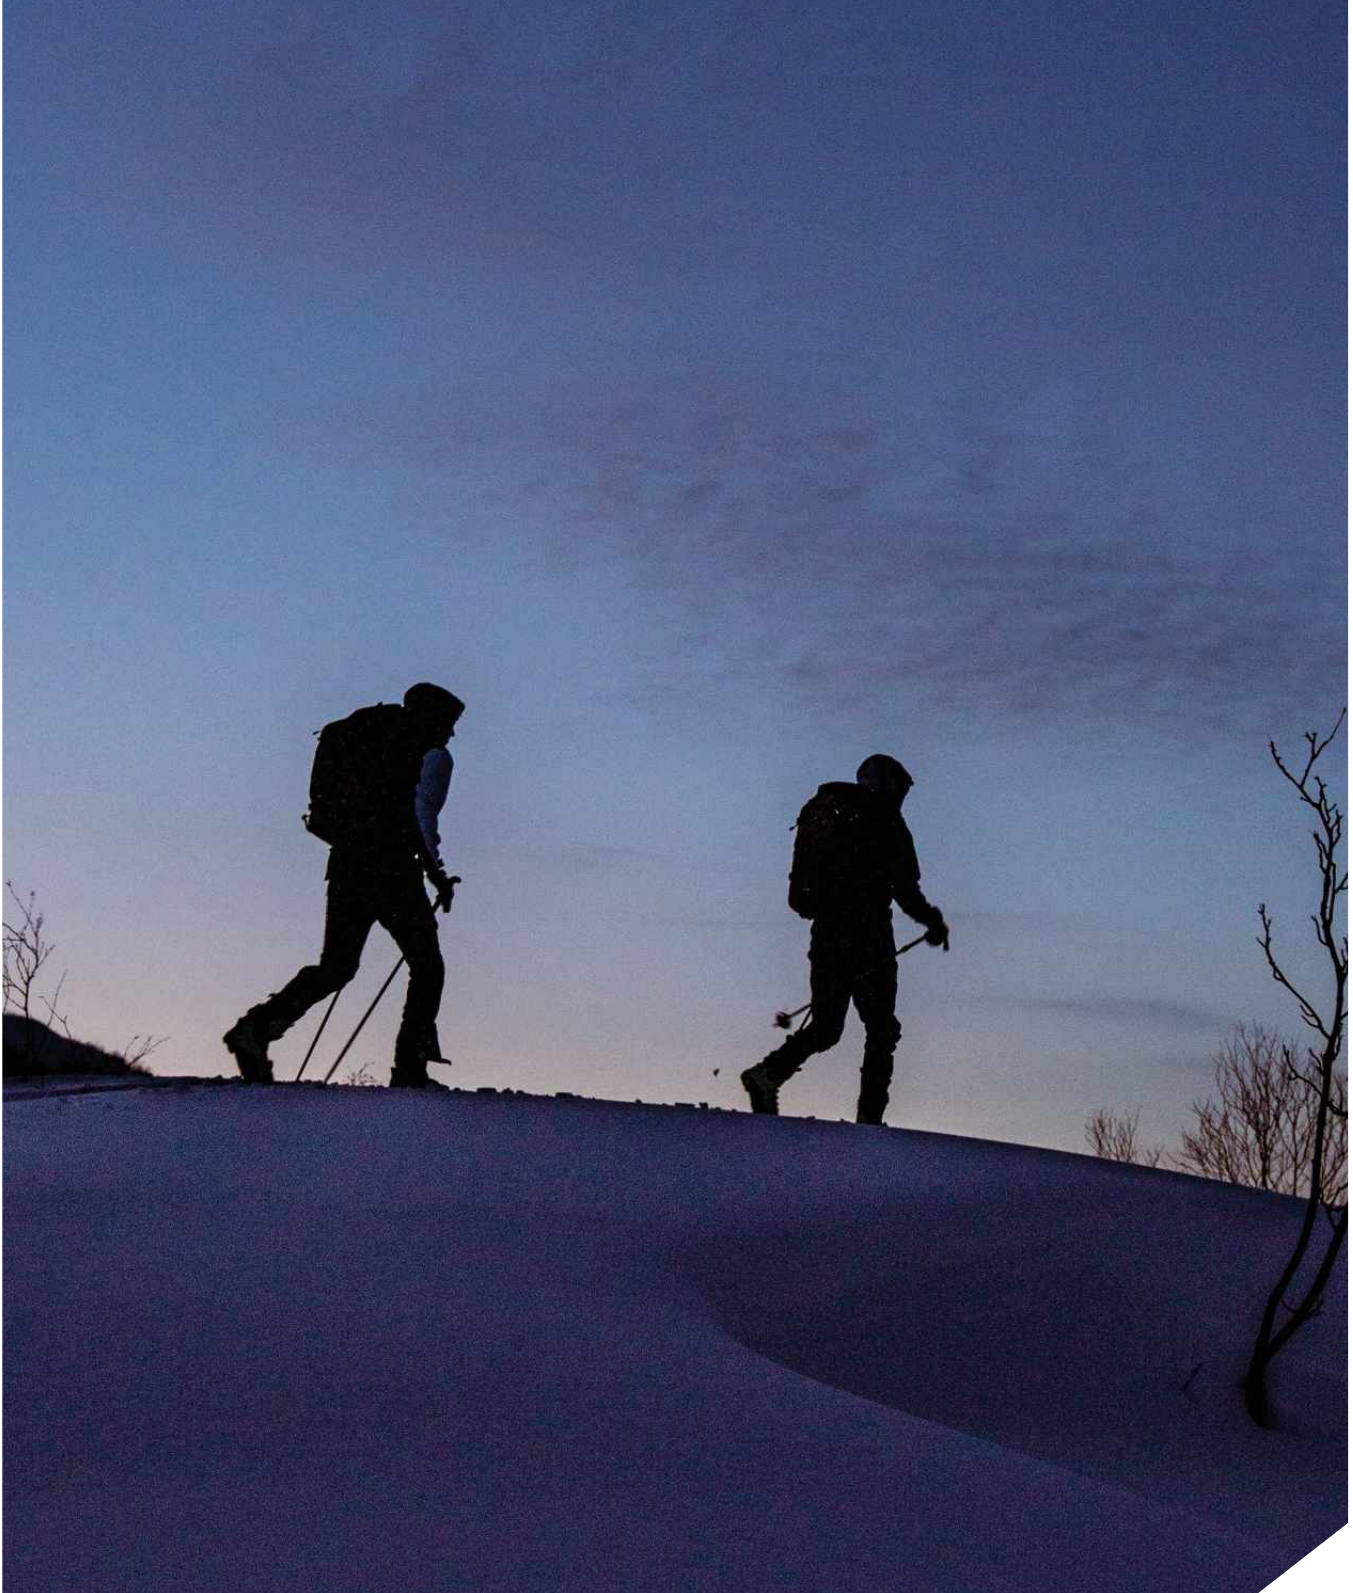

F4-23-75 has a foam applicator for applying wax. Apply a thin layer over the base. Let it dry for approx. 5 minutes. Finish by polishing with Fiberlene T0151 or Nylon Brush T0166B. Apply F4 to the metal edges before storing your skis or board after the season. This prevents the edges rusting.

**F4
Glidewax Rub-on w/cork**

F4-23-60	60 g / 2.1 oz	10 pcs
----------	---------------	--------

The F4-23-60 has cork on the back-side of the box. Rub or dab the glide wax on the base. Polish the wax and the base with the cork.

North Wax

North mountain wax and tools is a contemporary interpretation of our passion for wax and tool making.

The perfect blend of tradition and modernity, North marks a return to the pure essence of what we love; crafting edges and bases for snow so nothing holds you back from the best on mountain experience possible.

100% biodegradable performance ski wax in a 100% recycled package. It comes in three temperature ranges and sizes depending on when you alpine ski and how often you will wax your skis.

INTRODUCING THE NORTH 100N

- 100% Natural Ski Wax: Your Natural Performance Solution

Elevate your skiing and snowboarding experience with the revolutionary North 100N – a cutting-edge formula meticulously crafted from 100% natural ingredients. The N100 wax is made up of a harmonious blend of ethically and sustainably sourced ingredients, including carnauba wax, sunflower seed wax, beeswax, and juniper oil. This creation embodies our commitment to both performance and environmental responsibility.

UNLOCK THE POWER OF NATURE
Each ingredient in North 100N Ski Wax is thoughtfully selected, ensuring a ski wax that not only enhances your glide but also helps preserve the planet we cherish. We've taken an extra step by infusing a touch of juniper oil, handpicked and distilled in the breathtaking landscapes of Alvdal, Norway. This natural antiseptic oil brings a fresh scent, while enriching the wax with superior rheological properties.

Peak Performance, Every Descent
Experience the alpine world like never before with the North 100N advantage. Our expertly balanced combination of natural waxes guarantees exceptional performance across all snow conditions. Whether you're carving down the slopes or embracing the backcountry, the North 100N Ski Wax empowers you to conquer with confidence.

SIMPLICITY IN APPLICATION
The North 100N Ski Wax is designed for ease, making your pre-adventure routine smooth and hassle-free. Applying, scraping off, and brushing the wax is a breeze, allowing you more time to relish every exhilarating moment on the mountain.

A VERSATILE CHOICE
Tailored to meet the needs of alpine skiers, snowboarders, and cross-country enthusiasts alike, North 100N Ski Wax offers unbeatable versatility. From the meticulously groomed slopes to the untouched serenity of the backcountry, trust in North 100N to elevate your performance to new heights.

Elevate your glide.
Elevate your journey.
North 100N - 100% Natural Ski Wax – Naturally Unleashed.

North Alpine Tools

TA3001NO-N
North Pocket Edger

TA3001NO-N	87° – 88°	12 pcs
Side-Edge 87° – 88° degrees		

ALL in ONE Tool, Pocket size file holder with 40 mm file

TA3003NO
North Diamond Pocket Edger

TA3001NO-N	87° – 88°	12 pcs
Side-Edge 87° – 88° degrees		

Pocket size diamond sharpener. Giving you a razor sharp edge for hard packed conditions.

SB034NO
Plexi Scraper

SB034NO	1 pcs
---------	-------

This sharp Acrylic scraper removes excess wax from the base to provide optimum gliding.

T0166NO
Felt - Nylon Brush

T0166NO	1 pcs
---------	-------

The ideal brush when applying any North liquid or paste wax. Spread the wax evenly on the base using the felt pad then brush clean with the Nylon brush side. Using this brushes increases the durability of the wax.

T0159NO
Bronze/Nylon Brush

T0159NO	1 pcs
---------	-------

This combi-brush is our best all-around brush. It will polish the liquid/pastewaxes and will also work on the harder melt on waxes. The has both bronze and nylon bristles for all waxes.

T0022NO
Polishing Cork

T0022NO	1 pcs
---------	-------

Our "Rub Out" cork provides the friction required to smooth out any liquids, paste and solids waxes. Essential tool.

SB031NO T Bar Freeride,
Snowboard/ Ski Vise

SB031NO	1 pcs
---------	-------

Light weight and compact. Works on all Freeride skis and Boards for both waxing and tuning!

T77
NORTH Waxing Iron

T77110NO	110 V	1 pcs
T77220NO	220 V	1 pcs
T77100JNO	100 V	1 pcs

Variable temperature function for all wax types and an ergonomic shaped handle for easy movement along the base.

Nordic Easy Glide

Nordic Easy Glide Liquid

N3NC 80 ml / 2.7 oz 15 pcs

For waxless skis. With applicator.

Nordic Schuppen Spray

N4C 150 ml / 5 oz 10 pcs

For waxless skis.

Zero Ski Anti Icing Spray

Zero 70 Economy Spray

N6C 70 ml / 2.4 oz 15 pcs

To be used in the kick section of touring classical skis with mechanical grip from factory or skis abraded with sandpaper. Let dry for two minutes. With upside down applicator.

Skin

Don't let wet skins ruin your skiing. These products protect your integrated skins from icing and getting wet and improve the glide properties.

In particular, the risk of icing is present around zero when the snow changes from wet to dry. The Skin series works as an impregnation in these conditions, preventing the ice from building up. Over time, skin picks up wax leftovers, dirt, and pollution from the snow, making the skin both slower and less effective.

By using Skin Cleaner, you will help restore the properties of the skin and increase its efficiency. Skin Cleaner also provides anti-icing properties.

**N19
GLIDE WAX for Skin Skis**

N19 100 ml / 3.38 oz 10 pcs

SWIX glide wax for skin skis is especially developed for skis with integrated skins, and is developed purely for the glide section of the ski. It is an all temperature product offering great gliding properties no matter what the weather conditions are. The practical foam applicator ensures a great product distribution, and the felt polisher at the bottle bottom ensures excellent product durability.

**N20
SWIX Skin IMPREGNATION**

N20 80 ml / 2.7 oz 15 pcs

Deep impregnation of your integrated skins. Long lasting. Improves water resistance and reduces dirt uptake. Developed to protect integrated skins from icing and to improve the glide properties.

The risk of icing is in particular present around zero. To be used after cleaning the skins. Repeat after approx. 10 ski trips. Does not include Fiberlene.

**N21
SWIX Skin BOOST**

N21 80 ml / 2.7 oz 15 pcs

Improves the skins gliding properties. Fast and can be applied anywhere. Protects integrated skins from icing and improves glide properties.

Recommended maintenance for skin skis to extend their life span and get a better ski experience. To be applied before skiing on a regular basis.

**N22
SWIX Skin CLEANER**

N22 70 ml / 2.37 oz 10 pcs

Removes dirt and wax residues picked up from the snow. Cleans integrated skins in a gentle way without affecting the skin glue. Restores the properties of -the skin and increases its efficiency. To be used after skiing. Includes Fiberlene.

**P15N
KIT for Skin Skis**

P15N 1 pcs

Maintenance kit for skis with integrated skins. Contains Skin Boost (N21), Skin Cleaner (N22), glide wax (N19) and Fiberlene paper for application. Everything you need to get a better ski experience.

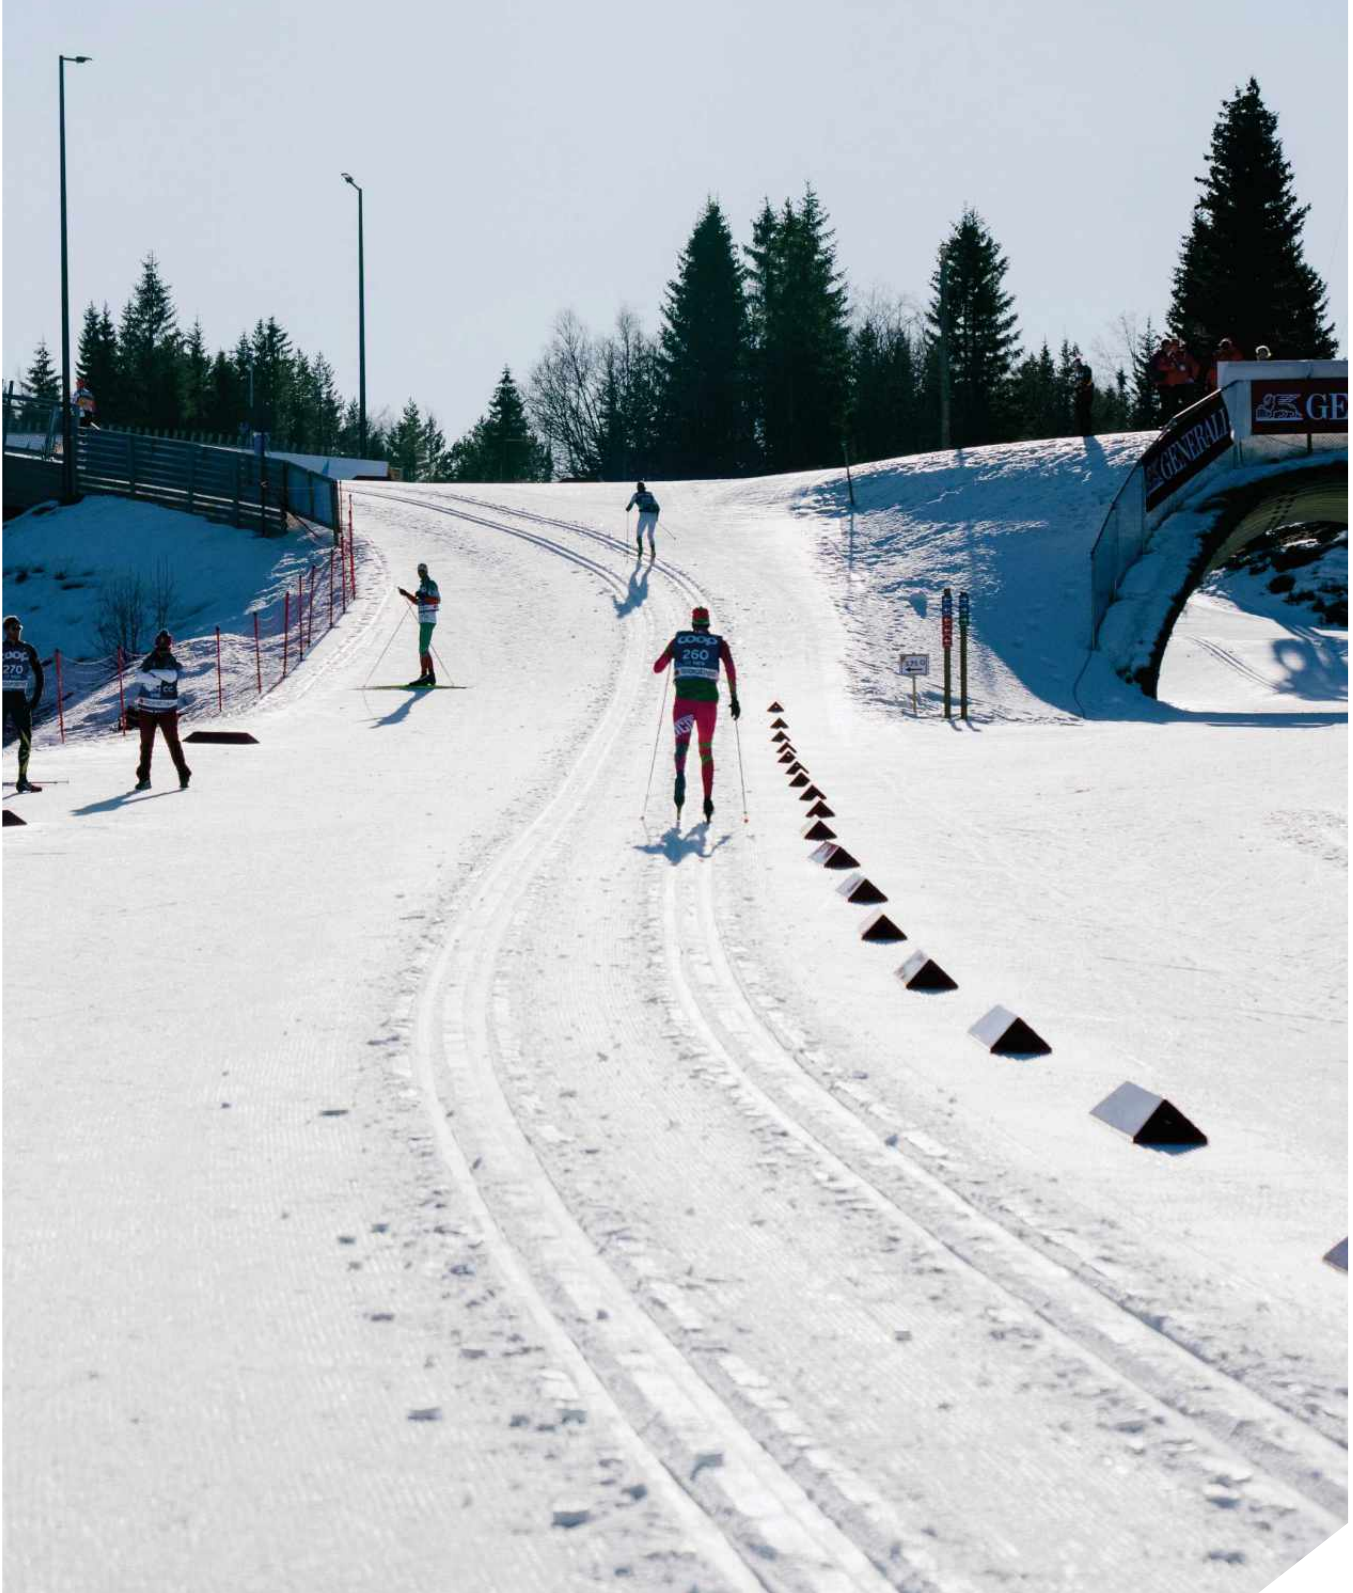

**P19N
Skin & Liquid Glide Kit**

P19NG 1 pcs

A kit for skin care and liquid glide. Great ski care in no time.

Content: HS06L-125 og HS08L-125, T0151, N21, N22 and T0166B

Kick Wax

Applying kick waxes can be easy but, at the same time, challenging. Even the most experienced skier needs clarification before a race. Nerves are brittle, and wax tips come from all over.

In many situations, ski waxing means compromising. The final goal is a superb kick and excellent glide. However, the conditions are often variable, making this goal difficult to achieve. The most important is finding the best combination of kick and glide to give you the best overall performance. Don't wax too slippery, and don't wax too aggressively. You know, the margins.

VG Base Binders

The VP waxes are made for top racers and serious skiers, but can be used by recreational skiers who want that little extra, while the VG binders are essential to keep you going even on the longer distances.

VG030 BLUE Base Wax

VG030 43 g / 1.5 oz 10 pcs

-  New Snow
-20° → 1°C / -4° → 30°F
-  Fine Grained snow
-20° → 1°C / -4° → 30°F
-  Old Snow
-20° → 1°C / -4° → 30°F

To be used as first layer for all hard kick waxes in new and fine grained snow. Easy to apply: Rub on and iron in with a waxing iron. Cork smooth.

VG035 GREEN Base Binder

VG035 43 g / 1.5 oz 10 pcs

-  Fine Grained snow
-22° → -1°C / -8° → 30°F
-  Old Snow
-22° → -1°C / -8° → 30°F

A flexible and practical Basewax for the VP and V-waxes for colder conditions than -1°C (30°F). To be used when the snow has been transformed (granular) and the wear on the wax is high. Rub on and iron in with a waxing iron. Cork smooth.

VGS35C Base Binder Spray

VGS35C 70 g / 2.4 oz 10 pcs

-  Fine Grained snow
-22° → -1°C / -8° → 30°F
-  Old Snow
-22° → -1°C / -8° → 30°F

A base binder spray for fine grained and transformed snow. It is applied by holding the bottle upside down and moved slowly along the skis kick-zone on both sides of the groove. The distance between the base and nozzle should be approx. 5 cm. Just apply a thin layer, wait a few minutes and add a few layer of kick wax for the conditions. You will then have a much more durable coating than with just the kick wax. Very convenient for training and when you don't have an iron available.

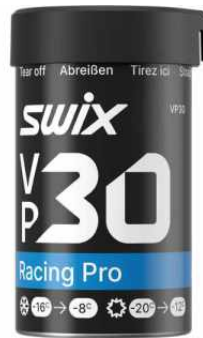

VP-Line Hard Kick Wax

The VP waxes are made for top racing, but have also proved interesting for Recreational and Sport skiers because of excellent properties.

The wax contains a new additive designed to impart maximum lubricity. This improves the stick-slip properties of the wax and gives an excellent feeling.

Each VP wax has two specified temperature ranges. One for falling and new fallen snow, characterized by sharp snow crystals with relatively strong penetration capacity. The other range is for older snow, when the crystals are rounded off and have less penetration power.

The VP line covers all temperatures from -20°C to +3°C.

VP30 Racing Pro

VP30 43 g / 1.5 oz 10 pcs

	New Snow -16° → -8°C / 3° → 18°F
	Old Snow -20° → -12°C / -4° → 10°F

Light blue kick wax designed for dry and cold to extremely cold conditions.

VP40 Racing Pro

VP40 43 g / 1.5 oz 10 pcs

	New Snow -10° → -4°C / 14° → 25°F
	Old Snow -15° → -5°C / -7° → 23°F

Blue kick wax designed for dry and cold winter conditions. A safe choice for normal midwinter inland conditions.

VP45 Racing Pro

VP45 43 g / 1.5 oz 10 pcs

	New Snow -5° → -1°C / 23° → 30°F
	Old Snow -8° → -3°C / 18° → 27°F

Purple-blue kick wax designed for normal winter conditions well below the freezing point. An obvious "next step" if VP40 does not provide a safe kick.

VP50 Racing Pro

VP50 43 g / 1.5 oz 10 pcs

	New Snow -3° → 0°C / 27° → 32°F
	Old Snow -6° → -1°C / -21° → 30°F

Purple kick wax designed for conditions a few degrees below the freezing point. Provides perfect kick until you experience moderate shiny tracks.

**VP55
Racing Pro**

VP55 43 g / 1.5 oz 10 pcs

-  **New Snow**
-2° → 1°C / 28° → 32°F
-  **Old Snow**
-5° → 0°C / -23° → 32°F

Dark purple kick wax designed for moist, and new or new fallen snow around zero. Can also be used on older snow just below the freezing point without sacrificing glide.

**VP60
Racing Pro**

VP60 43 g / 1.5 oz 10 pcs

-  **New Snow**
-1° → 2°C / 30° → 36°F
-  **Old Snow**
-4° → -1°C / -25° → 34°F

Purple-red kick wax working very well in moist, new snow and shiny tracks. Will also work on older, slightly transformed snow some degrees below the freezing point. If tricky conditions around zero, VP65 is recommended.

**VP65
Racing Pro**

VP65 43 g / 1.5 oz 10 pcs

-  **New Snow**
0° → 2°C / 32° → 36°F
-  **Old Snow**
-4° → 0°C / 25° → 32°F

Red/black kick wax with extraordinary properties when tricky conditions around the freezing point. Also brilliant on the cold side when high humidity and older/transformed snow. The black additive speaks for versatility and great anti-icing properties. VP65 works best on top of a couple of layers of a slightly harder wax. It also works great as a cover on top of klisters.

**VP70
Racing Pro**

VP70 43 g / 1.5 oz 10 pcs

-  **New Snow**
0° → 3°C / 32° → 37°F
-  **Old Snow**
-1° → 2°C / 30° → 36°F

Yellow klister-wax designed for moist and beginning wet, new snow. Can also be used in moderate transformed snow until just below the freezing point. If you experience very wet, new snow or coarse transformed snow klister is recommended.

V-Line Hard Kick Wax

The V-Line of hardwaxes is the traditional line of hard kick-waxes, made for racing and recreational skiing.

Although they do not have any fluorine additives, their quality is very high due to fully refined petroleum waxes, synthetic rubbers and pharmaceutical quality oils. The V-waxes, in certain the cold-snow waxes are frequently used in top racing, alone or in combination with VR-waxes.

Easy to use with two temperature intervals: NEW and OLD snow. Old, transformed snow is snow older than one day. TIP: In old snow you always wax softer!

V05 POLAR

V0005 43 g / 1.5 oz 10 pcs

	New Snow -25° → -12°C / -12° → 10°F
	Old Snow -30° → -15°C / -22° → 5°F

As the name indicates, this is hardwax made for the coldest conditions. Frequently used in the polar regions of Europe and North America.

V20 GREEN

V0020 43 g / 1.5 oz 10 pcs

	New Snow -15° → -8°C / 5° → 18°F
	Old Snow -18° → -10°C / 0° → 14°F

The well known cold snow wax, used for more than fifty years, has been modernized several times with new components.

V30 BLUE

V0030 43 g / 1.5 oz 10 pcs

	New Snow -10° → -2°C / 14° → 28°F
	Old Snow -15° → -5°C / 5° → 23°F

Another truly classic SWIX wax. To be used on moderate cold snow when skiing is at its best.

V40 BLUE EXTRA

V0040 43 g / 1.5 oz 10 pcs

	New Snow -7° → -1°C / 19° → 30°F
	Old Snow -10° → -3°C / -14° → 27°F

The most popular V-wax. A very flexible and versatile wax covering a large temperature- range on the cold side of freezing. To be utilized close to 0°C, demands relatively new snow and low air humidity (below 45-50%).

**V45
VIOLET SPECIAL**

V0045 43 g / 1.5 oz 10 pcs

-  New Snow
-3° → -0°C / 27° → 32°F
-  Old Snow
-6° → -2°C / 21° → 28°F

Also a very frequently used wax, both in racing and touring. When Blue Extra becomes somewhat slippery, a thin layer of Violet Special probably is the right wax.

**V50
VIOLET**

V0050 43 g / 1.5 oz 10 pcs

-  New Snow
0°C / 32°F
-  Old Snow
-3° → -1°C / 27° → 30°F

For many years a secret weapon in the wax-box of World Cup Servicemen. To be used when the snow is in a stage going from cold to wet, around freezing 0°C (32°F).

**V55
RED SPECIAL**

V0055 43 g / 1.5 oz 10 pcs

-  New Snow
0° → 1°C / 32° → 34°F
-  Old Snow
-2° → 0°C / 28° → 32°F

For moist new snow up to +1°C (34°F) and down to -2°C (28°F) in older more transformed granular snow.

**V60
RED/SILVER**

V0060 43 g / 1.5 oz 10 pcs

-  New Snow
0° → 3°C / 32° → 37°F
-  Old Snow
-1° → 1°C / 30° → 34°F

For wet new snow up +3°C (38°F) and down to -1°C (30°F) in older more transformed granular snow. Apply thicker the warmer it is to secure grip.

Klister

Elite klister for demanding conditions.

World Cup Klister

New

KC60 World Cup Red Klister

KC60 55 g / 1.9 oz 10 pcs

0° → 4°C / 32° → 39°F

Moist Old
Transformed
Snow

Wet Corn
Snow

The new favorite racing klister for wet conditions! New World Cup klister from Swix is really versatile and masters all wet conditions. No matter if the snow is fresh, coarse or salted.

Nero Klister

Revolutionary klisters with a black ingredient that has shown an impressive performance. The key properties are enhanced in all aspects of the products.

Versatile

It can handle changing snow conditions very well and it has great anti-icing properties.

No floating Klister

It is durable and stays better within the kick-zone than other klisters.

Excellent dirt Management

It collects significantly less dirt from the snow than traditional klisters.

Great Kick over time

It provides a secure kick over longer time than traditional klisters, due to its special characteristics.

KN33 Nero Klister

KX Klister Line

The KX line presents a comprehensive range of klister waxes, formulated logically from hard to soft, tailored for conditions ranging from cold corn snow to extreme wet corn snow.

This is a complete klister line based upon formulas that has a logical build up going from hard to soft, from cold corn snow to extreme wet corn snow. The higher the number, the softer the wax.

The KX line is designed for top level competitions as well as recreational skiing.

KX20 Base Klister Green

KX20 55 g / 1.9 oz 10 pcs

All Temperatures

Frozen
Corn Snow

Wet Corn
Snow

Base klister for cold and warm conditions. To be used as first layer for other klisters. Always to be applied thin with an iron or heat gun. High wear resistance and adhesion.

KX30 Blue Ice Klister

KX30 55 g / 1.9 oz 10 pcs

-12° → -4°C / 10° → 25°F

Frozen
Corn Snow

To be used as first layer for other klisters. Always to be applied thin with an iron or heat gun. High wear resistance and adhesion.

KX35N Blue Extra Klister

KX35N 55 g / 1.9 oz 10 pcs

-8° → 0°C / 18° → 32°F

New
Snow

Old
Snow

Versatile klister, more tolerant to colder and fine grained snow than the earlier version (KX35). Hard and durable. As a top layer klister it performs best on fine grained snow from around the freezing point and colder. Also great as a middle layer klister on top of KX20 or KB20, covered with kickwax, or as top layer universal klister.

KX40S Violet Silver Klister

KX40S 55 g / 1.9 oz 10 pcs

-4° → 2°C / 25° → 36°F

Frozen
Corn Snow

Moist Fine
Grained Snow

Developed for transformed and fine grained snow. Very good when warmer than 0°C and relatively fine grained snow. The klister that goes the farthest into dry snow without icing!

**KX45N
Violet Special Klister**

KN45N 55 g / 1.9 oz 10 pcs

-4° → 1°C / 25° → 34°F

Frozen
Corn Snow

Wet Corn
Snow

Particularly suitable for coarse-grained snow when the air temperature goes from minus to plus. Also used as a middle layer on top of KX20 or KB20, before wet-snow klister is applied as a top layer.

**KX55
Violet Extra Klister**

KX55 55 g / 1.9 oz 10 pcs

-6° → 4°C / 21° → 39°F

Frozen
Corn Snow

Moist Old
Snow

Moist Fine
Grained Snow

A racing klister covering a wide range of snow conditions. Compared to the popular K22 universal klister, our KX55 are working in colder temperatures and more fine-grained snow.

**KX65
Red Wet Klister**

KN65 55 g / 1.9 oz 10 pcs

1° → 5°C / 34° → 41°F

Wet Corn
Snow

For wet and moist coarse corn snow.

**KX75
Red Extra Wet Klister**

KX75 55 g / 1.9 oz 10 pcs

2° → 15°C / 36° → 59°F

Very Wet Corn
Snow

The best klister for very wet, old and corned snow. Can be used as base klister on wet snow.

K Klister Line

K is the iconic universal klusters, trusted at the highest level of performance.

For optimal klister application, work indoors and ideally at room temperature. This ensures the klister remains pliable and easy to handle.

Tools like a waxing table, waxing profile, waxing iron, heat gun, and the T60 Wax Machine will streamline the process and enhance the result. Read more about the wax machine further down in the workbook.

Begin with applying a base klister – KB20C serves as an outstanding binder. You can spray it directly on to the ski.

K65C Universal Quick Klister

K65C 150 ml / 5 oz 10 pcs

-5° → 10°C / 23° → 50°F

Quick and easy application. Ideal for applying when you need more wax on the trail.

K70C Red Quick Klister

K70C 150 ml / 5 oz 10 pcs

0° → 15°C / 32° → 59°F

For very wet granular snow. Easy to apply as K65C.

K22 VM Universal Klister

K22 55 g / 1.9 oz 10 pcs

-3° → 10°C / 27° → 50°F

Wet Corn Snow

Frozen Corn Snow

For coarse, granular snow changing from wet to crust. A very popular and "flexible" klister. Used in racing as well as recreational skiing.

K21S Silver Universal Klister

K21S 55 g / 1.9 oz 10 pcs

-5° → 3°C / 23° → 37°F

Wet Corn Snow

Frozen Corn Snow

Moist Fine Grained Snow

Developed for transformed and fine grained snow. Very good when warmer than 0°C and relatively fine grained snow. The klister that goes the farthest into dry snow without icing!

KB Base Binder

KB is the essential base klister spray.

It's not just about ensuring your kick wax stays put during icy challenges or long distance race, it's about optimizing every kick you make. For the ideal waxing experience with your kick skis, always begin with a base binder. Dive deeper into our VG-VP concept to explore more of our binders.

Base binders are designed to hold the hard kick wax on the base when the snow is coarse and abrasive.

KB20 Green Base Klister Spray

KB20C	70 ml / 2.4 oz	10 pcs
KB20-150C	150 ml / 5 oz	10 pcs

-15° → 10°C / 5° → 50°F

Frozen
Corn Snow

Wet Corn
Snow

Makes other klisters last longer! First klister layer to be applied. To be used with regular klister on top, or aerosol Quick Klister. For Racing, Sport and Recreation. Used in World Cup.

Kits

Kickstart your journey to waxing perfection.

**P17
Liquid Glide Kit**

P17 1 pcs

Ski waxing has never been easier. This kit contains two liquid gliders which you just spray on your skis for excellent glide.

Content: HS06L-125 og HS08L-125 and T0166B

**P0019
Gunde Pack**

P0019 1 pcs

Content: V40, V45, V55, T10 in zip lock bag.

**P0020G
Cross Country Wax Kit**

P0020G 1 pcs

Pack with everything you need for good grip on your skis. Practical ski trip pack with three grip waxes that cover most temperatures. A nice gift pack!

Content: V40, V45, V60, T10, and T87. P0027

**P0034
Waxpack**

P0034 1 pcs

Content: V40, V60, K22, T10, T151, I61C, T87 In fanny pack.

**P21N
Glide & Edge Kit**

P21N 1 pcs

A basic kit of essentials for a day on the slopes. The TA3001N file guide, which comes in a handy pocket format, can sand the ski edges to either 87 or 88 degrees and gives a very good end result on the steel edges.

The Quick glide wax F4-23-100 is super easy to apply and works well at all temperatures. The polishing felt at the bottom of the bottle should be used lastly for even greater durability.

**P19N
Skin & Liquid Glide Kit**

P19NG 1 pcs

A kit for skin care and liquid glide. Great ski care in no time.

Content: HS06L-125 og HS08L-125, T0151, N21, N22 and T0166B

Wax Cases and Wax Kits

**T440F
Hot Wax Kit**

T440F 1 pcs

Swix Hot Wax Kit is filled with all necessary equipment you need to start hot waxing your skis.

Hot waxing is the next level of taking care of your skis and snowboard and improving the performance for even more fun, whether you do cross-country skiing, alpine skiing or snowboard. The kit contains T77 Waxing iron Economy, PS6 Blue (60g), PS8 Red (60g), T824 D Plexi Scraper, T162B Bronze brush, T87 All purpose scraper and T151 Fiberlene paper. All products are perfectly fitted into a 100% recycled plastic case.

**T0068
Wax Box Medium (empty)**

T0068 1 pcs

Universal wax box with foam inside.
For Nordic and Alpine. 40 cm x 31 cm
x 8 cm

**T64-3
Medium Wax Case XC (empty)**

T64-3 1 pcs

Wax Cases Nordic

T64-3F Medium Wax Case XC (filled)

T64-3F 1 pcs

Perfect kit for the cross-country enthusiast. Filled up with kickwax, klisters and liquid glide wax for all conditions. The box contains eight kick waxes, four klisters, two liquid gliders, scraper, cork, basecleaner, sandpaper, fiberlene paper and brush.

Products in kit: Kick waxes: VG35, V20, V30, V40, V45, V50, V55 and V60. Klisters: KB20C, K21S, K22N and KX75. Liquid gliders: PS6L-80 and PS8L-80. Basecleaner I61C. Cork T11. All purpose scraper T87, Cork/ Nylon brush T196B. Fiberlene paper T151.

T550 Wax box Cross Country (empty)

T550 1 pcs

Especially designed compartments for hard waxes, klisters, glide waxes, cleaners, brush-es, scrapers, corks, structure tools. Delivered without wax.
37 cm x 56 cm x 15 cm

Cleaning products

Maintain your skis with our comprehensive range of wax removers, cleaners, and care products. Our base cleaners and accessories are designed to remove hard waxes, klisters, and glide waxes effectively.

**I91C
Base Cleaner Set**

I91C 1 pcs

25 pcs containing I62C and T151
Fiberlene.

**I61C, I62C
Base Cleaner Aerosol**

I61C 70 ml / 2.4 oz 10 pcs
I62C 150 ml / 5 oz 10 pcs

**I64N, I67N
Base Cleaner Liquid**

I64N 500 ml / 16.9 oz 10 pcs
I67N 1000 ml / 33.8 oz 10 pcs

**I25
Hand Cleaner Cream**

I25 70 ml / 2.4 oz 10 pcs

75 m 100% natural product. Very
effective for removing klister and other
dirt!

**I63C
Base Cleaner**

I63C 150 ml / 5 oz 1 pcs

With Fibertex scrub applicator for
efficient removal.

**T0150
Fiberlene Cleaning Towel**

T0150 40 m / 130 feet 10 pcs
T0150B 200 m / 650 feet 1 pcs

Large roll and X-Large roll

**T0151 Fiberlene Cleaning Towel
and Ironing Towel**

T0151 20 m / 65 feet 15 pcs

**T0156P-24
Racing Polishing Cloth**

T0156P-24 20 m / 65 feet 15 pcs

**I84
Glide Wax Cleaner Liquid**

I84-70N 70 ml / 2.4 oz 10 pcs
I84-150N 150 ml / 5 oz 1 pcs

Cleaner for glide wax / conditioner for
racing skis. Pump spray (no propellant
liquid).

**I84N
Glide Wax Cleaner Liquid**

I84N 500 ml / 16.9 oz 1 pcs

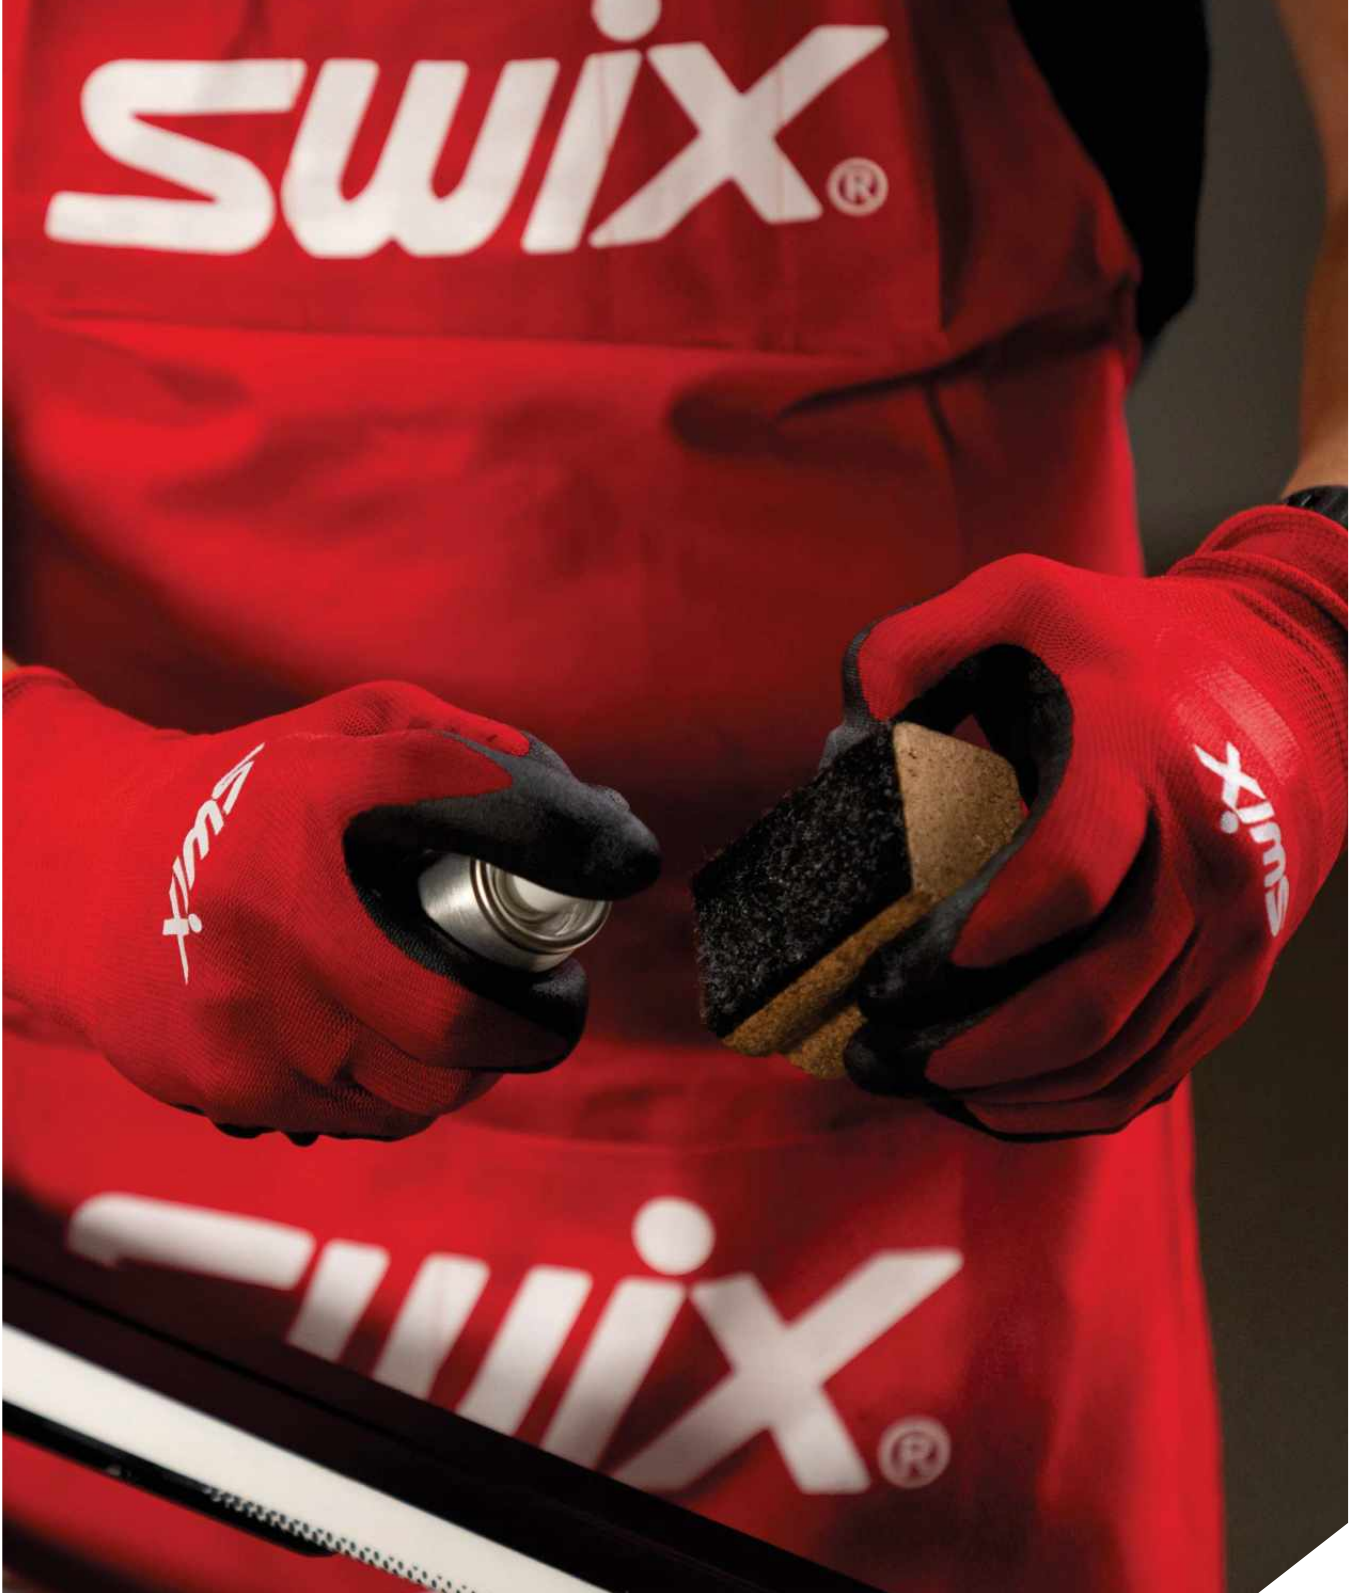

Cleaner for glide wax / conditioner for
racing skis.

**I94
PRO Cleaner**

I94 250 ml / 8.45 oz 1 pcs

The new Pro Cleaner is designed to effectively remove fluoros, dirt, wax, and silicones from the ski while adding a thin and strong protective wax layer on the ski base. The Norwegian Ski Association's wax team recommended using Pro Cleaner to remove fluoros from the ski base.

Tools

Corks

**T0011
Synthetic Combi Cork**

T0011 #120 10 pcs

Synthetic Combi Cork with #120 grit sandpaper attached with Velcro®. A combi cork with sandpaper to be used on the kick zone before applying kick wax; Will make the kick wax adhere better to the base.

**T0011F-25
Synthetic Cork with Felt**

T0011F-25 10 pcs

Synthetic cork with felt on one side. The felt is attached with Velcro for replacement. Use it for the perfect application and distribution of liquid wax. Spray directly onto the felt pad and distribute it onto the glide section of your skis. Alternatively, you can spray directly onto the ski base and even it out with the felt pad for perfect distribution.

**T0011SF-25
Felt Pads with Velcro**

T0011SF-25 10 pcs

Felt pads with Velcro for synthetic cork. This pack contains four felt pads, one for each color of liquid wax. Use them to distribute liquid waxes perfectly.

**T0012
Synthetic Racing Cork**

T0012 10 pcs

Synthetic racing Cork with higher density.

**T0020
Glide Wax Cork**

T0020 10 pcs

Natural cork.

**T0022
Snowboard Polishing Cork**

T0022 10 pcs

Natural cork.

**T0023
Snowboard Combi Felt and Cork**

T0023 10 pcs

For applicatio of liquids.

Sanding Papers

There are many uses for sandpaper with skis and boards. For alpine, freeride, and boards the fine abrasive papers can be wrapped around a file and used to deburr and polish the edges.

Sandpaper can also be used after polyethylene repairs to the base to blend the repair into the base and add some texture (structure). It is also possible to sand the entire base surface of skis and boards to remove scratches and old oxidized material. However, deburring, or removing polyethylene micro fibers, with Swix Fibertex is very important following base sanding. Swix has selected silicon carbide abrasives for its sandpaper. This very hard and sharp abrasive is best suited for working on bases and edges.

T0306 Sandpaper

T0306	#60	10 pcs
-------	-----	--------

Normally first paper on falling wet snow.

T0308 Sandpaper

T0308	#80	10 pcs
-------	-----	--------

To be used after T0306 #60.

T0011SP Sandpaper

T0011SP	#120	10 pcs
---------	------	--------

Replacement sandpaper #120 or T0011.

T0330, T0350 Sandpaper

T0330	#100	5 pcs
T0350	#180	5 pcs

Scrapers

T082 Plexi Scraper

-------	-------	-------

T410 Plexi World Cup Sharpener

T410		1 pcs
------	--	-------

Two walls for stable position makes it easy to sharpen precise. With long 100 mm quality file.

T412
El. Scraper Sharpener

T412-220-24	220 V	1 pcs
T412-110-24	110 V	1 pcs

T0080
Steel Scraper

T0080	10 pcs
-------	--------

Steel scraper for peeling or straightening bases.

T0086
Plastic Scraper

T0086	10 pcs
-------	--------

Plastic scraper for removal of kick wax or wax on the sides.

T0087
Groove / All purpose Scraper

T0087	10 pcs
-------	--------

Groove/All purpose scraper in polycarbon.

T0088
Pencil Groove Scraper

T0088	10 pcs
-------	--------

T0035
Handy Scraper

T0035	10 pcs
-------	--------

For hardwax and klister. Cross country

T0030 Universal Scraper with bottle opener

T0030	10 pcs
-------	--------

T0050
Grip Cover

T0050	100 mm	1 pcs
-------	--------	-------

A highly practical cover to protect the skin section while hot waxing in the glide section. Also ideal when traditional kick wax or klister has been applied, and it is needed to re-wax the glide section. Very easy to attach to the ski with 4 tightening clamps. Length can be adjusted from 45-68 cm.

Brushes

There is a wide selection of Swix brushes. They are made at different price levels with different qualities depending on whether you are in the sport/recreational category or into high level racing having to do many skis or boards in a short time.

Swix brushes are designed for brushing wax out of the structures (base patterns) in ski bases and snowboards after you have used the plexi scraper: Should be used in one direction, from tip to tail.

ROTO Brushes

Tips:

- It is recommended to use separate brushes for paraffin-type waxes from the ones used for powders.
- Always use safety glasses when Roto brushing.
- Don't press down too hard. Let the brush do the work.
- Brush from tip to tail with the brush rotation throwing the wax particles towards the tail.
- We suggest using a rotor cover with suction to minimize dust particles in the room when roto brushing.

**T0016N-25-XC
ROTO Natural Brush**

T0016N-25-XC 70 mm 1 pcs

**T0016N-25
ROTO Natural Brush**

T0016N-25 100 mm 1 pcs

Rotobrush natural, 100mm. New and stiffer bristles that remove waxes even more efficiently. For harder waxes, use it as a second brush after scraping and brushing with a steel brush. For softer waxes, you should use this as a first brush after scraping.

New

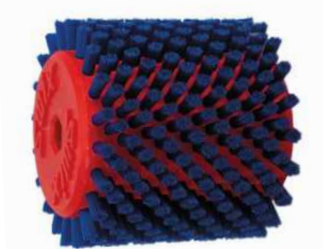

**T0017R-26-XC Racing
ROTO Soft Nylon Brush**

T0017W-XC 70 mm 1 pcs

Part of our XC-specific brush series, the Racing Roto Soft Nylon Brush is designed for maximum versatility and performance. The fine, red nylon bristles deliver a smooth, polished finish and are especially effective when used with Swix World Cup top-coat liquids. This universal brush enhances glide while leaving a clean, shiny base.

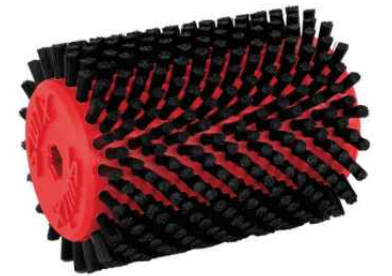

New

**T0017W-XC
ROTO Blue Nylon Brush**

T0017W-XC 70 mm 1 pcs

The nylon brush is a universal brush for the final polishing of the base after applying liquids, hot waxes, or using roto fleece. We recommend using a drill with a minimum rotation speed of 1800 rpm for best results. Move the brush in overlapping movements from the tip to the ski's tail.

**T0017B-26-A
ROTO Nylon Alpine**

T0017B-26-A 100 mm 1 pcs

The Stiff Racing Roto Nylon Brush is specially engineered for alpine ski tuning. Its firm bristles and optimal thickness deliver a smooth, glossy finish to your ski base, ensuring top performance on the slopes. Ideal for polishing all types of waxes and powders, this brush is the perfect tool for racers and serious skiers who demand the best.

**T0018F-XC
ROTO Hard Fleece**

T0018F-XC 70 mm 1 pcs

**T0018F-2
ROTO Hard Fleece**

T0018F-2 100 mm 1 pcs

**T0018W-XC
ROTO Brush Merino Wool**

T0018W-XC 70 mm 1 pcs

For top coats. The roto Fleece is an excellent brush for improving the performance and durability of liquid glide waxes. Always do the final polishing with a nylon brush after using the roto fleece. We recommend using a drill with a minimum rotation speed of 1800 rpm for best results. Move the brush in overlapping movements from the tip to the ski's tail.

Warning: Don't put too much force against the base when roto fleecing since this will create a lot of heat and possibly damage the base.

Part of our XC-specific brush series, the Racing Roto Soft Nylon Brush is designed for maximum versatility and performance. The fine, red nylon bristles deliver a smooth, polished finish and are especially effective when used with Swix World Cup top-coat liquids. This universal brush enhances glide while leaving a clean, shiny base.

**T0019S-XC
ROTO Steel Brush**

T0019S-XC 70 mm 1 pcs

**T0019S
ROTO Steel Brush**

T0019S 100 mm 1 pcs

To refresh bases before waxing. Second brush on wax after horsehair T0016M. The steel brush is used as the first brush after hot waxing and scraping before the horsehair brush. And also for deep cleaning of the base after cleaning the glide zone. For really soft waxes, we recommend using a horsehair brush as the first brush before using the steel and then finishing with the horsehair or nylon brush. We recommend using a drill with a minimum rotation speed of 1800 rpm for best results. Move the brush in overlapping movements from the tip to the tail of the ski. Warning: We recommend lightly dulling a new rotosteel brush with sandpaper #100 before using it for the first time. The steel brush should always be used in the same rotating direction.

**T15
ROTO Cover with Suction**

T15-100	100 mm	1 pcs
T15-140	140 mm	1 pcs

Ergonomic roto handles with driveshaft and protective cover, that fits SWIX' 100mm and 140 mm roto brushes.

**T0014/15HPS-25
ROTO Handle Cover Shaft**

T0014HPS-25	100 mm	1 pcs
T0015HPS-25	140 mm	1 pcs

For 140 mm brushes double Roto brushes 70 mm + 70 mm.

**T0014
ROTO Hexagonal Drive Shaft**

T0014SS - HEX	100 mm	1 pcs
T0014SM - HEX	140 mm	1 pcs
T0014SL - HEX	210 MM	1 pcs

Ergonomic roto handles with driveshaft and protective cover, that fits SWIX' 100mm and 140 mm roto brushes.

**T15-LN
ROTO Cover Racing Twist Lock**

T15-LN	100 mm	1 pcs
--------	--------	-------

L-bend twist-lock adapter for connecting SWIX roto covers to Swix Snap-Lock and our suction system.

**T15-SNAP
ROTO Snap Lock**

T15-SNAP		1 pcs
----------	--	-------

Snap lock for fast and easy change between Swix Suction cover and Swix Suction frame. You need only one hose and can easily change it from one part to another by pushing the button and pull them apart.

Fits perfectly with Swix Flexi hose (T15H)

**T15H
ROTO Flexible Hose**

T15H		1 pcs
------	--	-------

Flexible hose for Swix suction system. Can be stretched from 1m and up to 4 meters. Fix the flexi hose to your vacuum cleaner and to your suction cover or suction frame. We recommend to attach the hose to the roof above your workbench or in the top of your ski storage rack (T0077-FR) for the most efficient way of working.

Hand held Brushes

Two brushes are enough for standard waxes:

- After scraping the wax with a plexi scraper use a steel brush (T0179) or a bronze brush (T0162). Steel is more efficient and longer lasting than bronze. The “after scraping brush” is the most important brush!
- For finish use a fine nylon brush (T0160).

T0191B
Rectangular Fine Steel Brush

T0191B 0.06 mm 1 pcs

Ultra fine bristles. Goes deep into the base structure. Cleans and refreshes the base. Often used as second brush on wax. 4 to 5 strokes.

T01990-25
Big Steel Brush

T01990-25 0.25 mm 1 pcs

Designed for alpine skis. This high-quality steel brush has been tested and developed by alpine racing service personnel. It should be used as the first brush on wax after scraping to remove wax from the structure effectively.

T0179B
Rectangular Steel Brush

T0179B 0.18 mm 1 pcs

Used as a first brush on wax after scraping. 5-6 strokes. High quality steel brush that has an excellent reputation in racing.

T01790
Oval Steel Brush

T01790 1 pcs

T0160B
Rectangular Fine Blue Nylon Brush

T0160B 0.12 mm 1 pcs

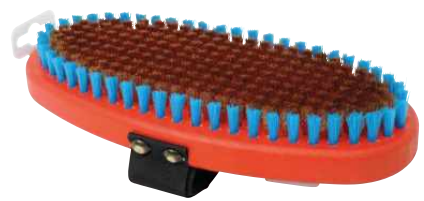

Polish brushes for all waxes. 5 to 10 strokes.

T0162B
Rectangular Medium Bronze Brush

T0162B 0.15 mm 1 pcs

First brushes used after scraping. 10 strokes

T01620
Oval Medium Bronze Brush

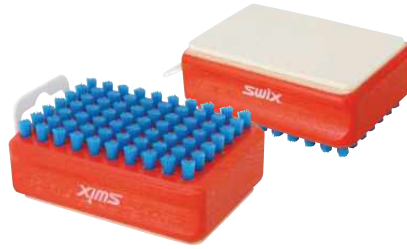

T01620 1 pcs

T0196B
Combi Brush / Cork and Nylon

T0196B 1 pcs

For application of rub-on waxes. This brush has natural cork on one side and short, fine nylon bristles on the other.

T0166B
F4 Combi Brush

T0166B 1 pcs

This is the ideal brush when applying any F4 product. White felt for spreading the F4 product evenly on the base and for polishing. The nylon for brushing and removing excess wax from the structure. This process can increase the durability of any F4 product.

T0159B
Combi Bronze and Nylon

T0159B 1 pcs

All round brush.

T0424B-24 1 pcs

T0410 World Cup Adjustable Structure Tool

T0410 1 pcs

Consistent pressure when structuring a ski base is very important and the new Swix structure tool allows you to set the pressure that is maintained throughout the process. The set comes with 4 different rollers. 1.0mm G, 1,0mm SR, 1,5mm SR and 0,5mm broken V structure roller. The Swix Structure tool will give you consistent structure and will improve the glide on both skating and classic skis. In cold new snow, we recommend you set the tool on lighter pressure and in warmer conditions and transformed snow, we recommend greater pressure. You can easily adjust the pressure by moving the handle on the side up and down. Made in Norway.

World Cup Ceramic Edge Finisher

TA800-25 World Cup Ceramic Edge Finisher

TA800-25

1 pcs

This product is designed and developed for racers, but it's a product that every ski enthusiast should have in their toolbox. It makes it easier than ever to achieve a race-ready edge. After sharpening- then finish with the new Ceramic edge finisher to remove any burrs and leave a super sharp, race-ready edge.

Excellent when paired with the EVO Pro Edger. The ceramic stones can easily be cleaned by using hot water and dish soap. Rub well with fingers. An eraser can be used to remove any metal residues.

- Three ceramic surfaces
- Super easy to use
- Improves the grip

EVO Pro Edger

TA3012 EVO Pro Edge Tuner

TA3012-110	110 volt	1 pcs
TA3012-220	220 volt	1 pcs

Swix Evo Pro Edge tuner is a high precision electrical side edge tuner, developed to restore, maintain and to give the edge a World Cup finish.

The EVO is very easy to operate, due to its ergonomically design, quick disc change and easy angle set-up. A key is also that the long lasting diamond disc is independent from the user pressure, as it is attached to a spring, making it impossible to mistakenly change the radius of the ski. The EVO is equipped with a high quality diamond disc, and by using a diamond material, the edge becomes harder and more durable. This ensures enhanced performance, especially on ice and artificially snow.

The EVO comes with a FINE polishing disc included. As spare parts COARSE, MEDIUM, FINE and EXTRA FINE are available.

TA3013XF Spare disc Extra Fine

TA3013XF	1 pcs
----------	-------

Super fine polisher and edge hardener, especially great for speed disciplines.

TA3013F Spare disc Fine

TA3013F	1 pcs
---------	-------

Super precise World Cup polishing and edge hardener.

TA3013M Spare disc Extra Medium

TA3013M	1 pcs
---------	-------

General maintenance, and is great when you need to fresh up the edge a bit more than just polishing.

TA3013G Spare disc Coarse

TA3013G	1 pcs
---------	-------

Angle set-up on new skis or when changing the angle. Also great for deburring when the edge is damaged.

TA3014 Box for EVO Pro Edger

TA3014	1 pcs
--------	-------

Box for EVO Pro Edger with pre-cut foam insert for great protection. Space for two extra EVO discs.

Take your edge tuning to the next level with our most advanced file guide yet. Crafted from high-grade anodized aluminum, it offers superior precision and a sleek, professional finish. Trusted by top technicians, this guide delivers a consistent base bevel with unmatched accuracy, possibly the most precise file guide on the market.

**TA0520
Base File Guide**

TA0520	0.5° - 2°	1 pcs
--------	-----------	-------

Adjustable base edge file holder for racing from 0,5° to 2,0°. Easy to adjust the angle. For skiers and servicemen. Quality construction.

Sidewall Cutters

New

**TA106-26
World Cup Sidewall Cutter**

TA106-26	1 pcs
----------	-------

High-performance sidewall cutter, developed and trusted by World Cup service technicians. This sidewall cutter is engineered for efficient and comfortable edge tuning. Its ergonomic design ensures better control and more comfortable in use. Cleanly removes sidewalls for easier, more precise edge filing. A must-have for serious tuners

**TA101N
Sidewall Cutter Racing**

TA101N	1 pcs
--------	-------

Sidewall cutter that removes plastic from the sidewalls of skis and snowboards. Ergonomically designed.

Sharpeners

**TA3006
Multi Edger**

TA3006 1 pcs

The Swix multi edger tool is all you need to sharpen and bevel your edges. You can set up the base and side edge in one tool! Dial a precise side angle from 0 to 5 degrees and 0.5 to 1.0 degrees on the base - nine different angles in total. Always set the base edge angle before the side edge angle. We add a bevel to the base edge to make the skis more predictable or forgiving and bevel the side edge to give more grip on hard snow and ice.

**TA3007
Phantom Edge File Holder**

TA3007 1 pcs

Economy side edge sharpener with 80 mm file. Easy adjustment from 85 to 90 degrees. Ergonomic, longer holder for stability and good grip. Protects the hand. Takes files and stones up to 6 mm thickness. Easy tightening of files.

**TA3008
Phantom R Edge File Holder**

TA3008 1 pcs

Economy edge sharpener with ball bearings and 80 mm file. Easy adjustment from 85 to 90 degrees. Ergonomic, longer holder for stability and good grip. Protects the hand. Takes files and stones up to 6 mm thickness. Easy tightening of files.

**TA3001N
Pocket Edger**

TA3001N 1 pcs

Pocket size file holder with 40 mm file. Side-edge 87 and 88 degrees. Easy to work with. Blister packed.

**TA100R
Spare Blade**

TA100R 1 pcs

Spare blade round for TA101N and TA106

**T0165N
Ski Brake Retainers**

T0165N 10 pcs

**TA3005N
Pocket Edger Kit**

TA3005N 1 pcs

Pocket size file holder with 40 mm file, diamond stone for polishing and abrasive stone for deburring the edge. Ski brake retainer included.

**TA3010N
Compact Edger Kit**

TA3010N 1 pcs

Ergonomic file holder with 80 mm file, Diamond stone for polishing and abrasive stone for deburring the edge. Ski brake retainer included.

**TA3010SD
Spare Diamond**

TA3010SD 80 mm 1 pcs

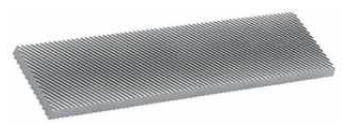

Spare part for TA3010N.

**TA3010SA

TA3010SA 80 mm 1 pcs

Spare part for TA3010N.

**TA3010SF
Spare File**

TA3010SF 80 mm 1 pcs

Spare part for TA3007, TA3008, TA3009N, TA3010N.

**TA3005SD
Spare Diamond Square**

TA3005SD 1 pcs

Spare part for TA3005N.

**TA3005SA
Spare Abrasive Square**

TA3005SA 1 pcs

Spare part for TA3005N.

**T0206XS
Spare File**

T0206XS 1 pcs

File for TA3001N, TA3005N

**R196-25
Tuning glove**

R196-25 Size: M, L 1 pcs

Take care of your hands when tuning skis. The Swix tuning glove is soft, breathable, and grip-secure. It will protect you against sharp edges and wax residues. The nylon glove with nitrile foam is CE-approved.

**R0386
Tape**

TA3010SD 50 mm 1 pcs

Base protect tape. 50 mm wide.

**R0389
Tape**

R0389 38mm wide 1 pcs

38 mm wide tape to hold skis together. Strong. 66 meters.

Stones

Diamond Files offer the special option of having the cutting ability of a file and the deburring and polishing ability of a stone all in one tool. The Diamond Files are perfect to carry in the pocket for quick removal of the fine burrs created on the edge when ski or riding on aggressive man-made snow.

Swix Diamond stones have taken the technology one step further. The diamond fabric has been adhered to the flat, true aluminum piece to assure that there is no pressure rollover when sharpening side and base bevels. This special diamond cluster pattern will last longer than conventional diamond strips. The configuration in conjunction with a polishing agent will help in moving the excess material from the edge to leave a clean, smooth mirror finish.

Racing Diamond Stone Line

**TAA100-25
Extra-Coarse Diamond Grindstone**

TAA100-25 #100 grade 1 pcs

Extra-coarse diamond grindstone, grade #100. 100mm with a new larger grinding surface. This grindstone is used to bevel and tune the edges of alpine skis and snowboards. This also removes hardened steel after the edge has hit stones or rocks. After the ski edge has been initially set in the production process at the factory, the tip and rear end have the same type of over-hardened surface, which is easily beveled using this grindstone

**TAA200-25
Coarse Diamond Grindstone**

TAA200-25 #200 grade 1 pcs

Coarse diamond grindstone, grade #200. 100mm with a new larger grinding surface. Used to bevel and tune sharp and precise edges on alpine skis and snowboards. This is one of the two grindstones that can do "everything" within this category.

**TAA400-25
Medium Diamond Grindstone**

TAA400-25 #400 grade 1 pcs

Medium diamond grindstone, grade #400. 100mm with a new larger grinding surface. This is the second grindstone you must have to maintain sharp and precise edges. With this grindstone, you can give the edge a fine polishing gloss.

**TAA600-25
Medium Diamond Grindstone**

TAA600-25 #600 grade 1 pcs

Medium diamond grindstone, grade #400. 100mm with a new larger grinding surface. This is the second grindstone you must have to maintain sharp and precise edges. With this grindstone, you can give the edge a fine polishing gloss.

**TAA1000-25
Extra Fine Diamond Grindstone**

TAA1000-25 #1000 grade 1 pcs

Extra fine diamond grindstone, grain #1000. 100mm with a new larger grinding surface. Grindstone for finishing the edges when a mirror-like finish is required. Used particularly in speed disciplines for optimum cutting precision.

**T0240
Dual Sided Stone**

T0240 1 pcs

Dual sided stone, fine and coarse in the sametool. Best use for efficiency after a ski comes out of the stone grinding machine, and for removal of rock damages spots on the edge before filing. A back shop work horse, heavy durable and long lasting.

**T0998-24
Ceramic Stone Fine**

T0998-24 1 pcs

Ceramic stone fine. A must-have to use for final passes on side and base edge. Hones and polishes the edge to refine the exact edge geometry from previous tools.

**TA060-26
World Cup True Bar**

TA060-26 1 pcs

A flat base is the foundation of precise edge work. Use the True Bar to identify the status of your base and edges before you start filing, ensuring optimal performance on snow.

Economy Diamond Stone Line

**TA200E
Red Economy Coarse**

TA200E TA200E 100 mm 1 pcs

**TA400E
Yellow Economy Medium**

TAA200-25 100 mm 1 pcs

**TA600E
White Economy Fine**

TA600E 100 mm 1 pcs

**TAA400SU Universal
Performance Diamond Stone**

TAA400SU 70 mm 1 pcs

For polishing edges, removing case hardening and deburring tips and tails.

Gummy Stones

**T0992
Grey Gummy**

T0992 1 pcs

Every person should own one of these. Great for removing rust and burrs. Also works well for feathering back (detuning) the tips and tails.

**T0994
Hard Gummy**

T0994 1 pcs

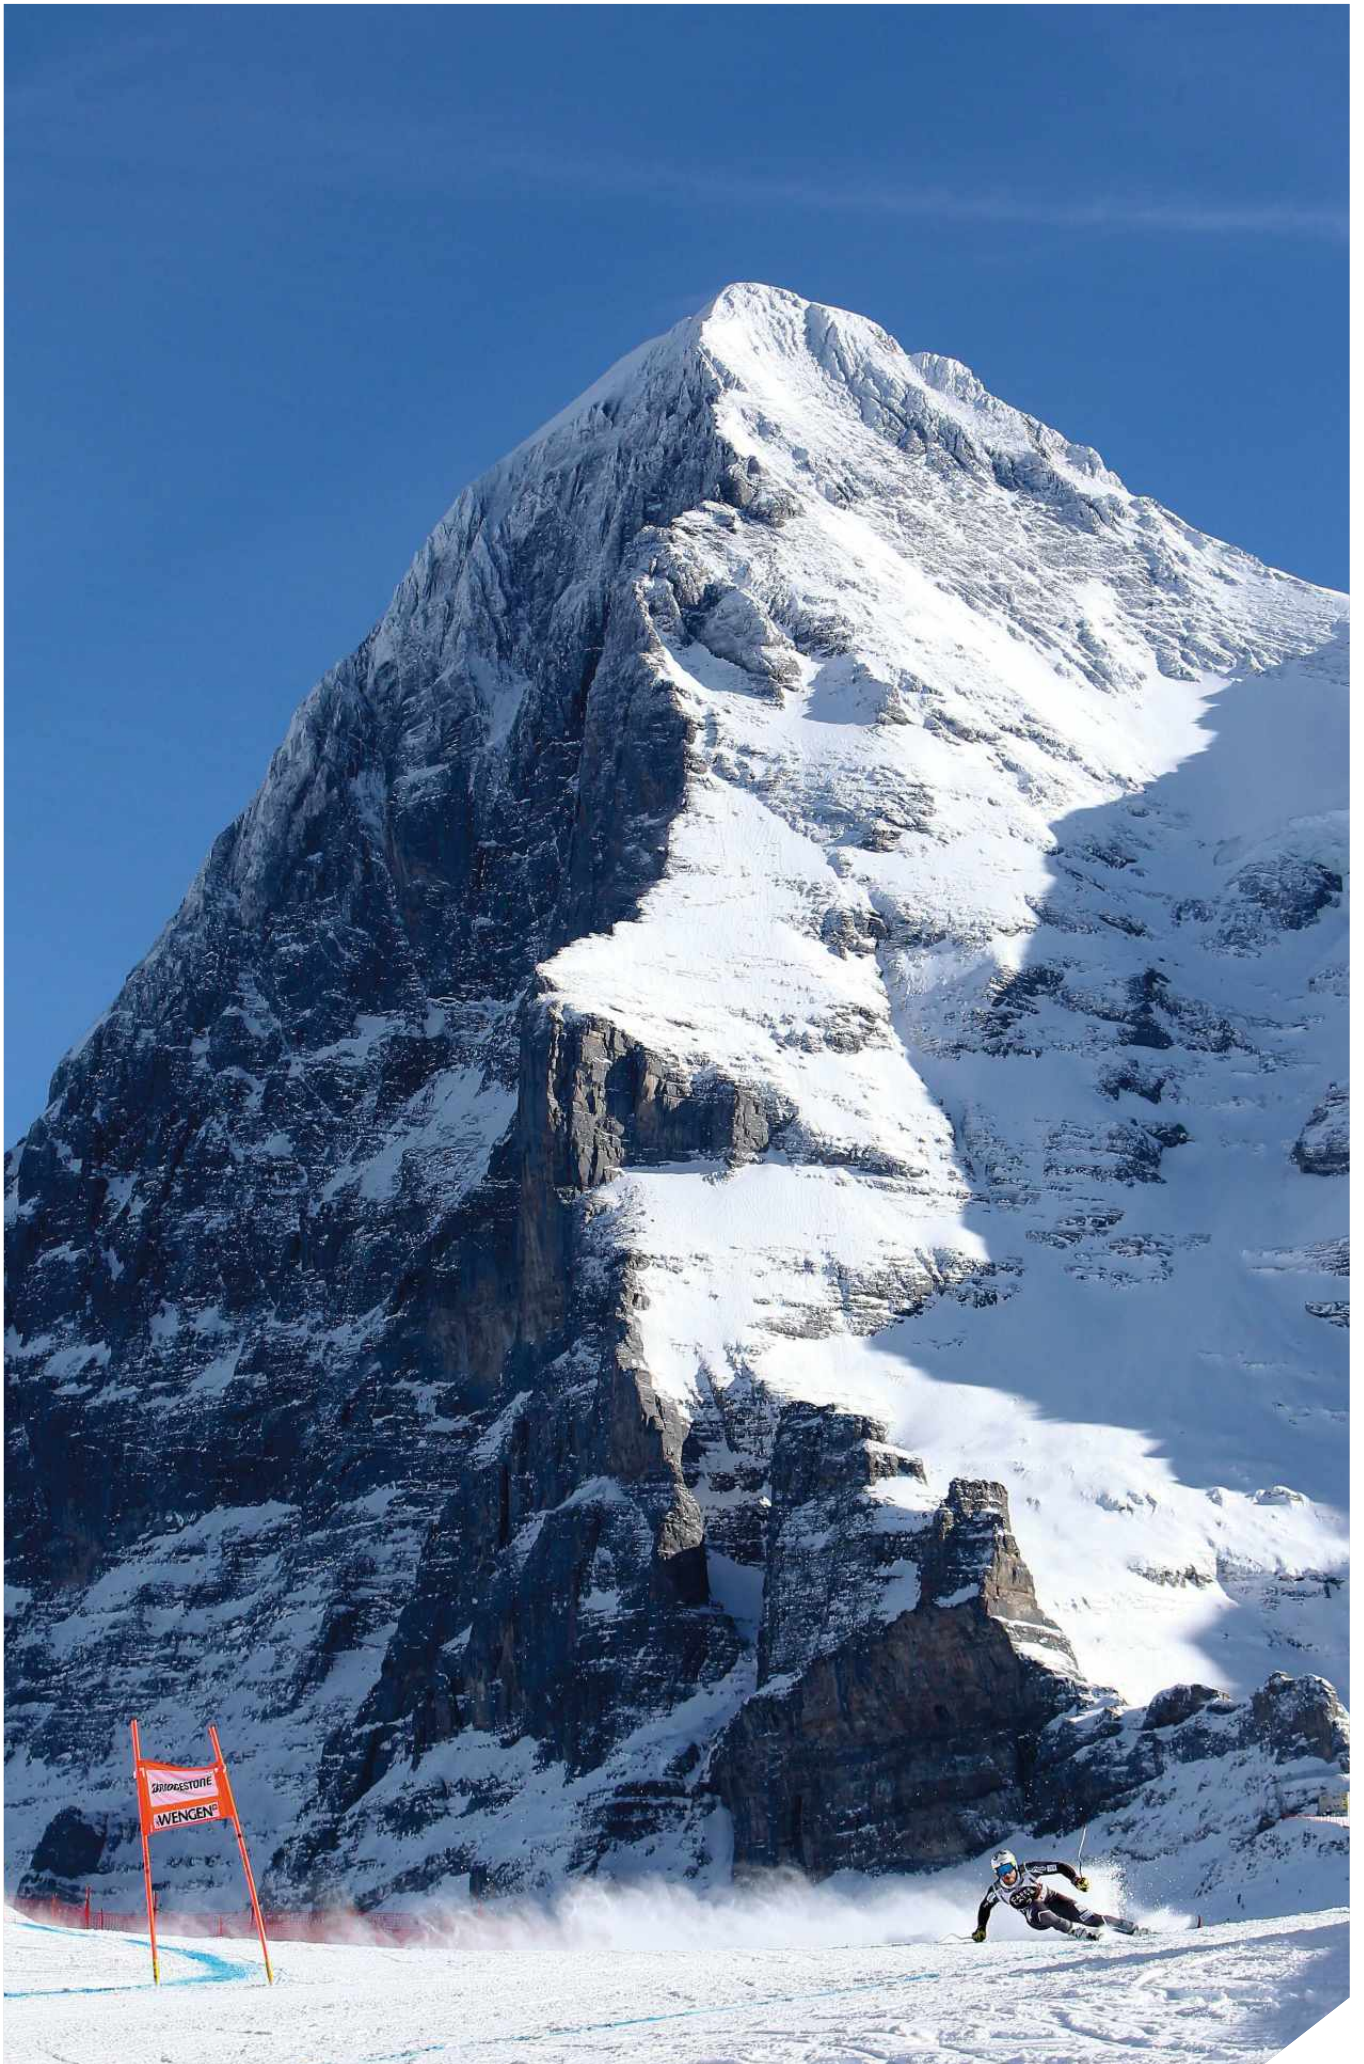

A hard gummy for polishing and light to medium edge clean up. Can be used after filing to remove micro burrs.

**T0995
Extra Hard Gummy**

T0995 1 pcs

Used after filing to remove micro burrs. Makes the steel edges more durable.

Files

Swix Racing files are made by the finest file makers in the world. The non-tang file offers a truer and flatter file. This translates to precise edge geometry that is demanded from the World Cup level to the enthusiast level. Best chrome and non-chrome files on the market today.

TPI = Teeth per inch
TPCm = Teeth per centimeter

Racing

T104RSC
Racing Pro file fine Cut 2

T104RSC 1 pcs

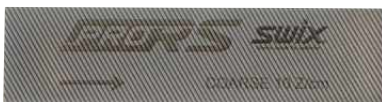

4" (100 mm x 25 mm x 3.5 mm) 16 tpcm.
Light chrome.

T106RSC
Racing Pro file Cut 1

T106RSC 1 pcs

4" (100 mm x 25 mm x 3.5 mm) 14 tpcm.
Light chrome.

T107RSC
Racing Pro file Bastard Cut 0

T107RSC 1 pcs

4" (100 mm x 25 mm x 3.5 mm) 10 tpcm.
Light chrome.

T0177B
File Brush

T0177B 1 pcs

T0108
Non Chromed Panzer File

T0108 1 pcs

12"/30 cm. All back shops need this. Super durable, can do it all. Top sheet clean up on rental skis to removing heaving burring.

T108SB
Non Chromed Panzer File

T108SB 1 pcs

4" (100 mm x 30 mm x 4.5 mm). Great for use in side-edge beveling guides that have integrated clamp.

Extra Coarse Racing Files

Working files, these files are to be used by the hands of advanced to professional ski and snowboard tuners.

T104X Chromed Finishing File

T104X 1 pcs

6"/15 cm. 20 tpcm, fine cut. Chromed Finishing File, shorter in length, increased TPCm to smooth out all Striations left by 2nd cut file. Most durable, best cutting 6" file Swix offers.

T106X Chromed All Purpose File

T106X 1 pcs

8"/20 cm. 16 tpcm, 2nd cut. Chromed all purpose file. Best all round shop/consumer file produced by Swix. Side beveling, base beveling set up before diamond work. Durable beyond all other files offered. A retail must for consumers.

T107X Chromed Bastard removal/setup File

T107X 1 pcs

8"/20 cm. 13 tpcm. Chromed Bastard removal/setup file. Best file for setting side angle. Non-tang files offer a truer, flatter file for exact degree application. Best file for initial side bevel.

Racing Files - Chromed

Traditional ski files, chromed and very sharp for your back shop or home ski tuner. These files have been the bench mark for standard ski files for years. These files are a great value for the price.

T104 **Viala Fine File**

T104 1 pcs

6⁷/₁₅ cm. 14 tpcm. Swix Viala file, fine. Traditional chromed tang file for finish work and light touch up. Much used in World Cup.

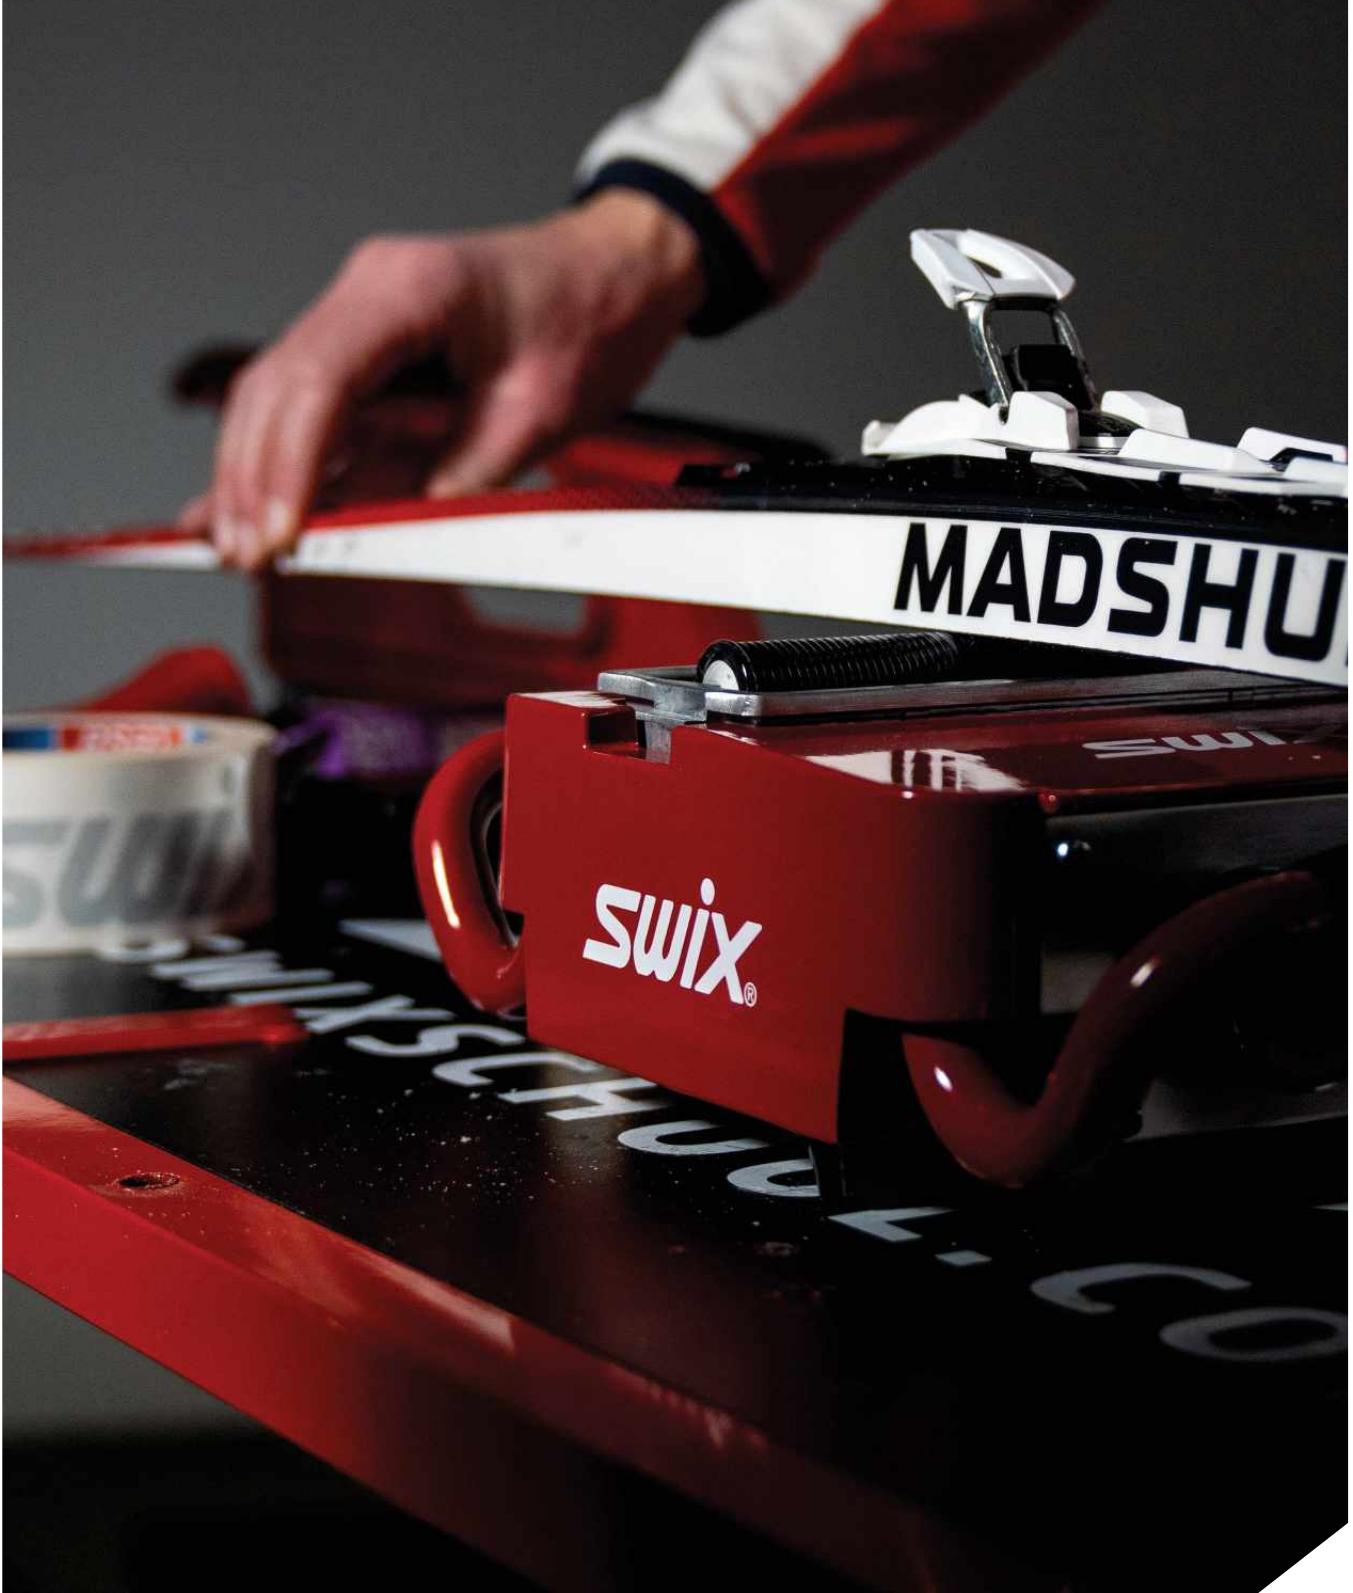

T106N **Viala file Medium 2nd cut File**

T106N 1 pcs

8⁷/₂₀ cm. 14 tpcm. Swix Viala file Medium 2nd cut. Traditional ski file. Excellent for doing it all. Side and base-edge beveling. 2nd option for price point retail file. One of the most popular files in the program. Much used in World Cup.

Waxing Machine and Irons

Waxing Machine

T60 Waxing Machine

T60-110-24	110 V	1 pcs
T60-220-24	220 V	1 pcs

The latest version boasts enhanced functionality and flexibility, featuring an easily accessible on/off switch, adjustable legs, and an expanded temperature range. These additions will boost the quality of outcomes and expand the range of possibilities. Easily let you apply the wax onto cross-country and alpine skis. Works perfectly for both glide-wax and Klister. The wax tray is exchangeable and comes with a lid, which allows for dedicated trays for specific waxes, and therefore no need for cleaning in between use. Extra trays are sold separately. Temperature range from 50 to 170 degrees Celsius.

Maintenance of Waxing Irons

It is important to take care of the waxing iron. Just a like a car or a bicycle, the iron needs to be maintained. This will secure better performance and longer life. If you do not follow these guidelines, the guarantee is no longer valid:

- Do not leave the iron at high temperatures when not in use. Adjust down to 120°C or turn it off. Particularly important after waxing at high temperatures.
- Always clean the iron with fiberlene paper after use. If not, small wax particles will remain on the iron giving out fumes. Over time the wax particles will fasten to the iron and make it black.
- If the iron becomes black, polish the plate with coarse fibertex.
- Try to avoid getting wax between the metal plate and the plastic top.
- Hold the iron in the handle, never lift it by the cord.
- When the iron is not in use keep it in upwards position: The upward position is important as it reduces the heating of the inside electronics.
- Place the iron where it is safe for not falling to the ground; The new iron holder for T70-H2 is recommended.
- If you have scratches in the base plate, use a fine sanding paper like grit 500.
- Be careful with use of solvents as this can have impact on the inside components.
- Avoid unnecessary bending of the cable, as it over time can lead to breakage of the cable.

T60-LID Tray Spare Lid

T60-LID	1 pcs
---------	-------

Spare lid for T60-TRAY.
NB: ONLY THE LID.

T60-TRAY Wax Tray

T60-TRAY	1 pcs

90	KN33 KX35N KX40S KX45N
80	K21S KN44 KX55
70	K22 HS06
60	KC60 KX65 KX75

* Recommended temperatures are for indoor use. If used outside or if you want a thicker or thinner layer, adjust the temperature approx +/- 10 degrees.

Waxing Irons

T70 Extreme Waxing Iron

T70110-2	110 V	1 pcs
T70220-2	220 V	1 pcs
T70110J-2	100 V	1 pcs

The World Cup T70 Extreme waxing iron lives up to its name. Made for professional use at the highest level in the World Cup.

220 Volt, 1,000 Watt, digital display, and a new movement sensor. The new movement sensor will automatically drop the temperature to 120 degrees after 15 minutes of inactivity to increase the iron's lifespan. When you turn on the iron, the temperature goes up to the last set temperature.

A 35 mm thick plate provides a stable temperature and optimal control when applying glide products. Temperature setting between 80°C and 200°C. A sensor located near the bottom guarantees correct temperature measurement. An angle of 7° on the iron ensures easier melting of the wax.

A good view in front of and behind the plate makes it easy to work in both directions. A width of 70 mm provides better control when waxing cross-country skis. Ergonomic handle. It is supplied in a robust plastic case.

T71 Alpine World Cup Waxing Iron

T71110A	110 V	1 pcs
T71220A	220 V	1 pcs

"T71" Alpine World Cup Waxing Iron for professional racing. 1000 Watt. 50% textured in front. "Floats" better when working with regular waxes on large bases. Angled in front and back. Rounded corners for smooth application. A 25 mm thick plate gives stable temperature and optimal control when applying wax. Temperature adjustment from 80°C to 180°C. Easy to set temperature with LED buttons.

T72 Racing Digital Iron

T72110	110 V	1 pcs
T72220	220 V	1 pcs

"T72" Racing digital iron 550 Watt. A 12 mm plate gives optimal temperature stability. The iron is controlled by a micro processor and has digital temperature regulation. Temperature adjustment from 110°C to 170°C. Angle on heating plate facilitates optimal application. In front the plate is straight to control glide zone waxing and classical skis.

T73D
Digital Sport Waxing Iron

T73D110	110 V	1 pcs
T73D220	220 V	1 pcs

"73D" Digital Sport Waxing Iron 1000W (220 V version), 850W (110 V version). A economy digital iron with an 18 mm thick plate for a great heat distribution, and with a digital microprocessor that ensures a very precise temperature control. The digital display is controlled by the adjustment wheel. Operating temperatures are 80°C to 170°C.

T77
Waxing Economy Iron

T77110	110 V	1 pcs
T77220	220 V	1 pcs

Great economy iron which is competitive with far more expensive models. Redesigned from scratch with an ergonomic body and a wide metal plate that suits both alpine, snowboard and nordic. Angled at one side to make it easier to keep a constant speed when melting the wax. The thick metal plate ensures a stable heating. Plate dimension 100×160 mm. Output: 1000W.

R0384N
Iron Bag

R0384N	1 pcs
--------	-------

Protects iron when traveling. Keeps cord and iron together. Heat resistant bottom for quick stow away. Fits all Swix Irons.

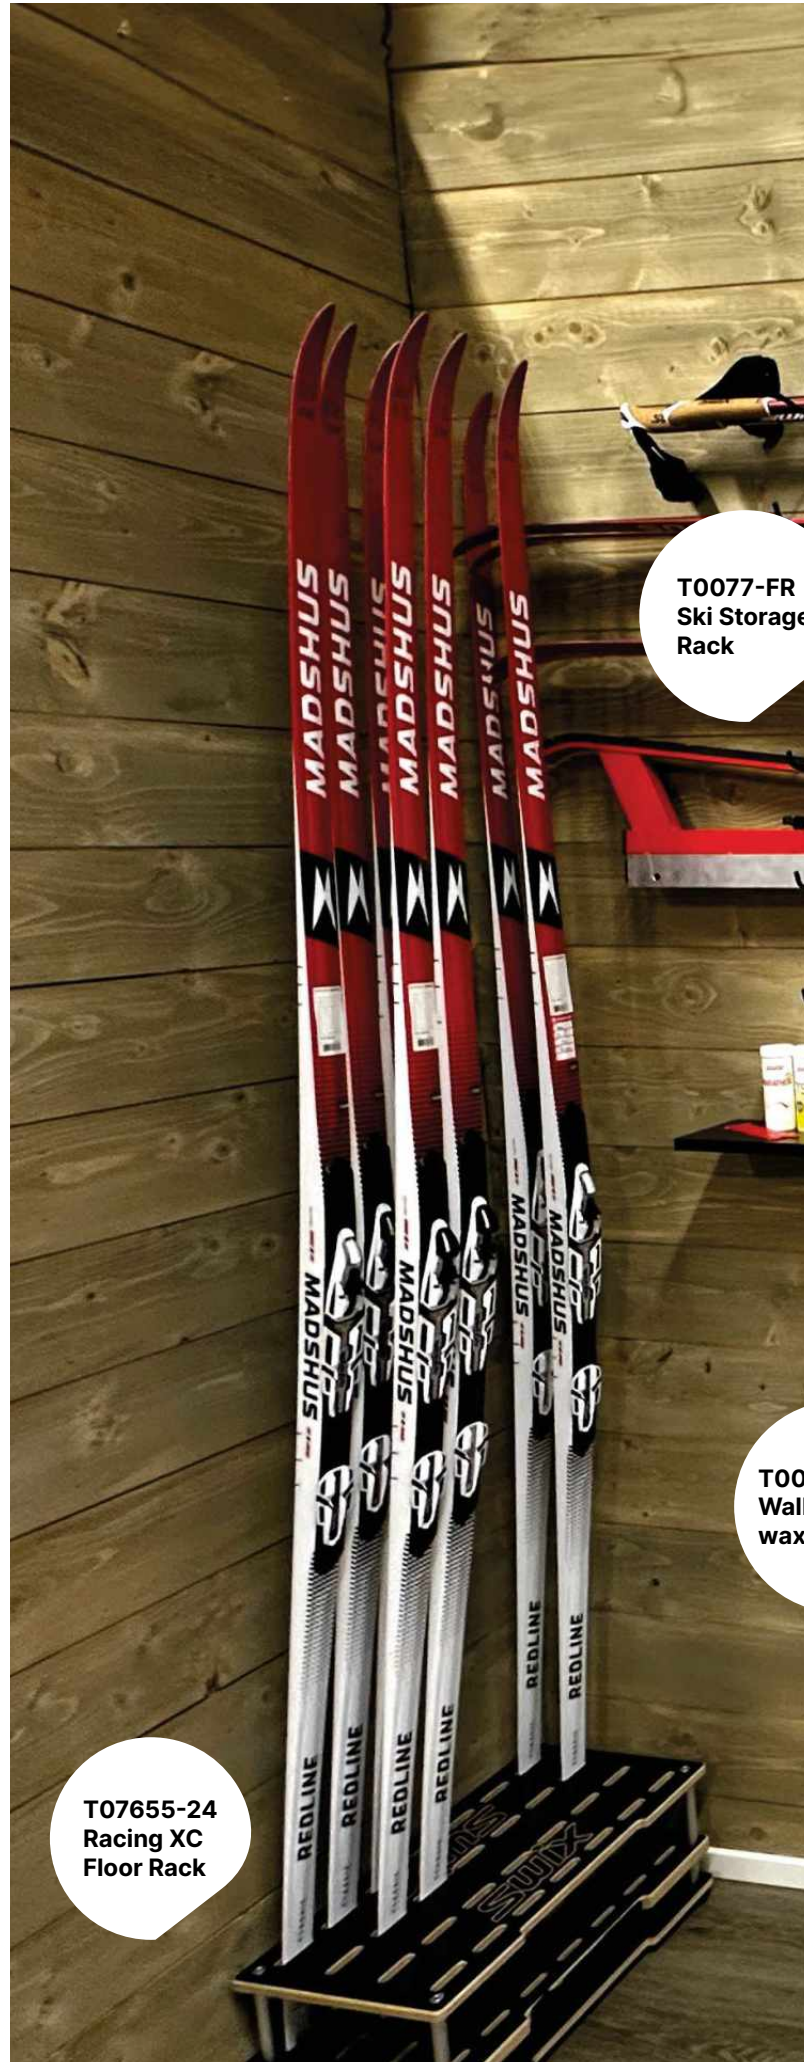

Waxing Cabin Setup

Confession time

We might be a tad geeky about this, but there's a special kind of joy in stepping into a neat, clean, and well-organized waxing cabin that's stocked with everything you need. We know many share this sentiment. However, not everyone has the luxury of dedicated space. Introducing our clever solutions: wall-mounted foldable waxing tables and shelves to keep everything in place.

Welcome, step into the world of smarter solutions.

Waxing Guidelines for Private Waxing Cabins

- Always use fluoro-free waxes.
- Make sure that the waxing facility is well ventilated.
- Always use a mask with the recommended filter (minimum A1P3) when applying and brushing wax products. Don't forget that particles can be retained in the air for quite a while.
- Make sure your mask is properly adjusted, and, as a minimum, replace the filter at the start of each season. Always follow the manufacturer's cleaning recommendations.
- Make sure your mask is properly adjusted, and, as a minimum, replace the filter at the start of each season. Always follow the manufacturer's cleaning recommendations.
- Wear suitable gloves when handling base cleaner and other liquid products.
- Do not heat the waxing iron to a temperature higher than necessary, and make sure to wipe the iron clean after application. The particle concentration rises as the difference increases between the melting point and waxing iron temperature.
- Do not use heating guns and gas burners in the waxing facility. Using these tools in the presence of airborne particles that contain fluorine risks generating toxic fumes.
- Smoking is prohibited in the waxing facility. Smoking and airborne particles is an extremely hazardous mix.
- Do not eat or drink in the waxing facility.
- Make sure to collect any waxing residue and dispose of it in the appropriate container.
- Wash your hands once you have finished waxing the skis.

For more tips on waxing and application see
swixsport.com - Wax Resources

Waxing Tables

T0077-FR
Ski storage rack

T0077-FR 1 pcs

The ski storage rack can be mounted on any SWIX waxing table. Practical when there are many skis or boards to prepare. An enhanced version that also can be wall-mountable. When mounted on the wall, you can easily attach the Racing Wax Shelf to the screw clamps to create additional storage space for your wax.

T0077-3
World Cup Waxing Table

T0077-3 1 pcs

Solid and stable. Prolongment for long skis. For professional servicemen. New top plate in aluminum for weight reduction and easier carrying. More durable in all weather conditions.

T0076W-24
Wall-Mounted Waxing Table

T0076W-24 1 pcs

Short on space in your waxing room? No worries. This waxing table can be conveniently folded up or down based on your needs.

T0076-3
Racing Waxing Table

T0076-3 1 pcs

A solid waxing table with improved stability. Upgraded version of one of our most sold waxing table. Highly improved stability by adding two more support bars. All adjustable feet with rubber feet for anti-slip. Solid table top made of pressed wood. Tabletop: 120 cm x 45 cm. Fits two sets of T0766 Profiles. Net. weight: 13.3 kg/29.7 lbs.

With Anti-slip rubber socks

**T00754
Economy Waxing Table**

T00754 1 pcs

One leg height adjustment. Great for snowboards. Height: 83 cm. Tabletop: 96 cm x 45 cm. Fits two sets of T0766 Profiles. Net. weight: 11.5 kg/25.3 lbs.

With Anti-slip rubber socks

**T0075W
Waxing Table Wide**

T0075W 1 pcs

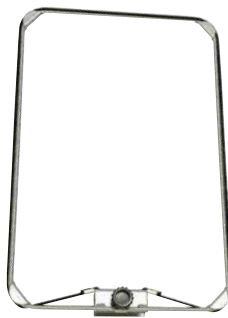

Comes with four rubber feet for anti slip. Adjustable height: 87 cm, 85 cm or 75 cm. One leg adjustable. Table top 120 cm x 35 cm. Fits two sets T0766 Profiles. Net. weight: 11 kg/24 lbs.

**T70-H2-24
Waxing Iron Holder**

T70-H2-24 1 pcs

Practical Waxing Iron Holder for mounting on to waxing table or workbench. Reduces the risk of dropping a valuable iron on floor. Fits all Swix Irons.

Waxing Carpet in Plastic**

T0152 1 pcs

Vises

T0149-50 Vise 3-Parts Jaws

T0149-50 50 mm 1 pcs

Swix three piece vise with 50 mm wide jaws. Opens from 40 to 100 mm, for better grip and stability when working on carving skis and radial alpine skis. 60 and 90 degrees side edge working position.

T0149-50UA Universal Adapter

T0149-50UA 1 pcs

For World Cup Ski Vise T0149-50. Converts your alpine vise into a snowboard or cross country vise. Made of solid plastic and quality rubber.

Cross Country Profiles

T0795 World Cup Profile

T0795 1 pcs

Lightweight aluminum. Front and back part are both adjustable. Can be used both ways without turning the profile. New movable fixing mechanism. Takes skis without bindings. Practical in small waxing rooms. Fits to T0079-1 legs or T0790-K clamps. Takes skis from 150 cm to 210 cm. Weight: 4.5 kg/10 lbs.

T0793-2 Cross Country Waxing Profile

T0793-2 1 pcs

Same profile in front and back. Lightweight aluminum. Front and back part are both adjustable. Fixation in binding. Takes skis from 140 cm to 210 cm. Fits to T0079-1 legs or T0790-K clamps. Weight: 3 kg/7 lbs

T0767-3 Cross Country Waxing Profile

T0767-3 1 pcs

Stable economy profile in aluminum and thermo plastic. Light and easy to adjust. Same profile in front and back for use both ways. Two parts that fit into each other. Each part is approx. 110 cm. Takes skis from 150 cm to 210 cm. Fits to T0079-1 legs or T0790-K clamps. Weight 1,8 kg/ 4 lb.

T00785N Cross Country Waxing Profile

T00785N 1 pcs

Three-piece alu profile to put in wax box. Ideal for traveling and to provide secure waxing conditions.

T0766 Thermo Plastic Profile for Cross Country Skis

T0766 1 pcs

Fits into waxing tables T0076, T0076-2, T00754, T0075W. Same profile both in the front and back. Includes holder for fixing the binding. Suitable for both classic and skating skis in lengths from 170-210 cm. Lightweight and very stable to work with. Weight: 1.4 kg/3.2 lbs.

Accessories for Profiles and Tables

**T007654N
Floor Rack**

T007654N 1 pcs

Floor rack for cross country racing skis (44 mm). Takes 30 pairs. 100 cm wide, 28 cm deep. Weight: 5 kg

**T07655-24
Racing XC Floor-Rack**

T07655-24 1 pcs

Tailored to hold 14 pairs Perfect for both competitive and recreational enthusiasts. Precision meets organization.

**T0077S-24
Racing Wax Shelf**

T0077S-24 1 pcs

Maintain a tidy waxing station with this handy shelf. It's tailored to fit the T77-FR Ski storage rack.

**T0790-K
Clamps**

T0790-K 1 pcs

Clamps for fixing T0793-2, T0795 or T0767-3 profiles to table.

**T0793
Slider**

T0793RK 30 mm 1 pcs
T0793-2RK 45 mm 1 pcs

T0793RK slider for fixing profile in T0795. Screw height 30 mm.
T0793-2RK slider for fixing profile in T0793-2. Screw height 45 mm.

**T0076SS
Screw**

T0076SS 6 mm 1 pcs

Screw, 6 mm for T0076, T0075, T00754 waxing tables.

**T0790T-75
Holder**

T0790T-75 75 mm 1 pcs

Holder, 75 mm, for fixing binding in profile T793-2 and T0766.

**T0079-1
Folding Legs**

T0079-1 1 pcs

Folding legs for cross country profiles T0793-2, T0795 and T0767-3. Now with two stabilizer arms and stronger legs.

**T0079NU
Nut**

T0079NU 8 mm 1 pcs

Nut, 8 mm for adjusting profile on T0793-2, T0079-1.

**T0769T
Holder**

T0769T 1 pcs

Holder for fixing binding in profile T0767-3.

SWIX Bulk Wax – Backshop

PS06W-26-1000 Pellets for Wax Machine

PS06W-26-1000 1000 g / 2.2 lbs 1 pcs

Temperature range from -6°C to -12°C (21°F to 10°F)

U2250 1 pcs
U2250C 1 pcs

U2250 Universal Wax 2250g Warm (9×250g). U2250C Universal wax 2250g Cold (9×250g)

T0150B Fiberlene cleaning XL

T0150B 200 m 1 pcs

Fiberlene cleaning XL 200m. Large roll of fiberlene paper used for cleaning and prepping skis.

T0140N Work Shop Vise

T0140N 1 pcs

Adapts to all types of skis and snowboards for side-edge or base-edge tuning, waxing, or adjusting bindings. Included:

- Central double vise with 90 mm jaws.
- 2 adjustable supports with special rubber for better grip.
- 4 additional grey jaws used for skis with plates.
- 2 additional white jaws used for snowboard.

I68N Base Cleaner Liquid

I68N 2500 ml 1 pcs

Effective wax remover and cleaner.

Waxing and Personal Protection

All of our mask and filters are CE-approved and protects you against all gas and particles, related to skiwaxing with swix products after our recommendations.

T41-MASK
Pro Mask with Fan

T41-MASK 1 pcs

CE-Approved mask for professional skiwaxers that provides the best protection. Professional protection system that protects against vapor and dust related to ski waxing. The system comes ready to use with two combination filters for gas and particles. We recommend to replace filters minimum once before, and halfway through the skiing season. Occupational waxers should replace filters every month. The system includes a full face mask, hosing, and a belt with a battery driven ventilation unit.

Only available in Racingservice

T43-MASK Professional
Mask with Replaceable Filter

T43-MASK 1 pcs

Professional mask that gives you the best protection against particle and vapour related to waxing skis. There are two filters included (gas and particle) that should be combined for the best protection. Filters should be replaced at least once a year. For frequent waxers we recommend an additional exchange during the skiing season. The package includes the mask, a storage box and two filters. Protection level: Gas: ABEK1. Particles: P3 R. Safety datasheet can be provided upon request.

T42-MASK Economy
Mask with Replaceable Filter

T42-MASK 1 pcs

Economy mask that gives great protection against particles and vapor related to ski waxing. There are two filters included (gas and particles) that should be combined for the best protection. Filters should minimum be replaced once a year. For serious waxers we recommend an additional exchange during the skiing season. The package included the mask, a storage box and two filters. They have protection level: Gas: ABEK1. Particles: P3 R.

T41-FGP
Spare Filter Gas and Particle

T41-FGP 1 pcs

Filter pack for T41-MASK. The package contains two gas filters and two-particle filters for T41-MASK. We recommend changing the filter before a new season and once during skiing season. Professional waxers should change the filter once a month. Protection level of the filters, Gas: ABE1, Particle: P3 R.

T42-2F
Filters for Economy Mask

T42-2F 1 pcs

The kit contains both gas and particle filters for T42- AND T43 -MASK, that should be combined for the best protection. Filters should minimum be replaced once a year. For serious waxers we recommend an additional exchange during the skiing season. Filters have protection level: Gas: ABEK1. Particles: P3 R.

Straps and Rack

R0385
Portable Wall Ski Rack

R0385 1 pcs

Takes 4 pairs of alpine skis or 8 pairs of cross country skis.

When winter days seems to be too short to be able to enjoy enough of snow, Swix Q2 Junior is the perfect partner for skiing fun! Superdurable composite shaft can handle almost all imaginary usage when gliding around the trees, jumping from the bums and enjoying the freeze on your cheeks. TCS Quick Release strap enables fast & easy exit & entry, if you wish to use poles as a slalom gates or take a zip from your thermobelt. Grippy and extremely durable Force Rubber handle will provide same secure grip, no matter the weather or even if you have forgotten the poles outside for a night.

New

TCS

XCQJ30-00 Q3 Junior Pole

XCQJ30-00 1 pair

Handle: XSHFR-TC Force Rubber TCS
Strap: XSSP3-LT Performance Loop TCS
Basket: RDTR93S '97 Glued
Size Range: 95 cm - 130 cm. 5 cm Interval
Recommended use: Groomed Trails

Swix Q3 Junior pole is a reliable pole for school & leisure. Light aluminum shaft can take it all without a fear of breaking. Easy to adjust and enter loop strap is attached with Quick Release for even easier usage. Force Rubber handle provides secure grip and superior durability in all conditions.

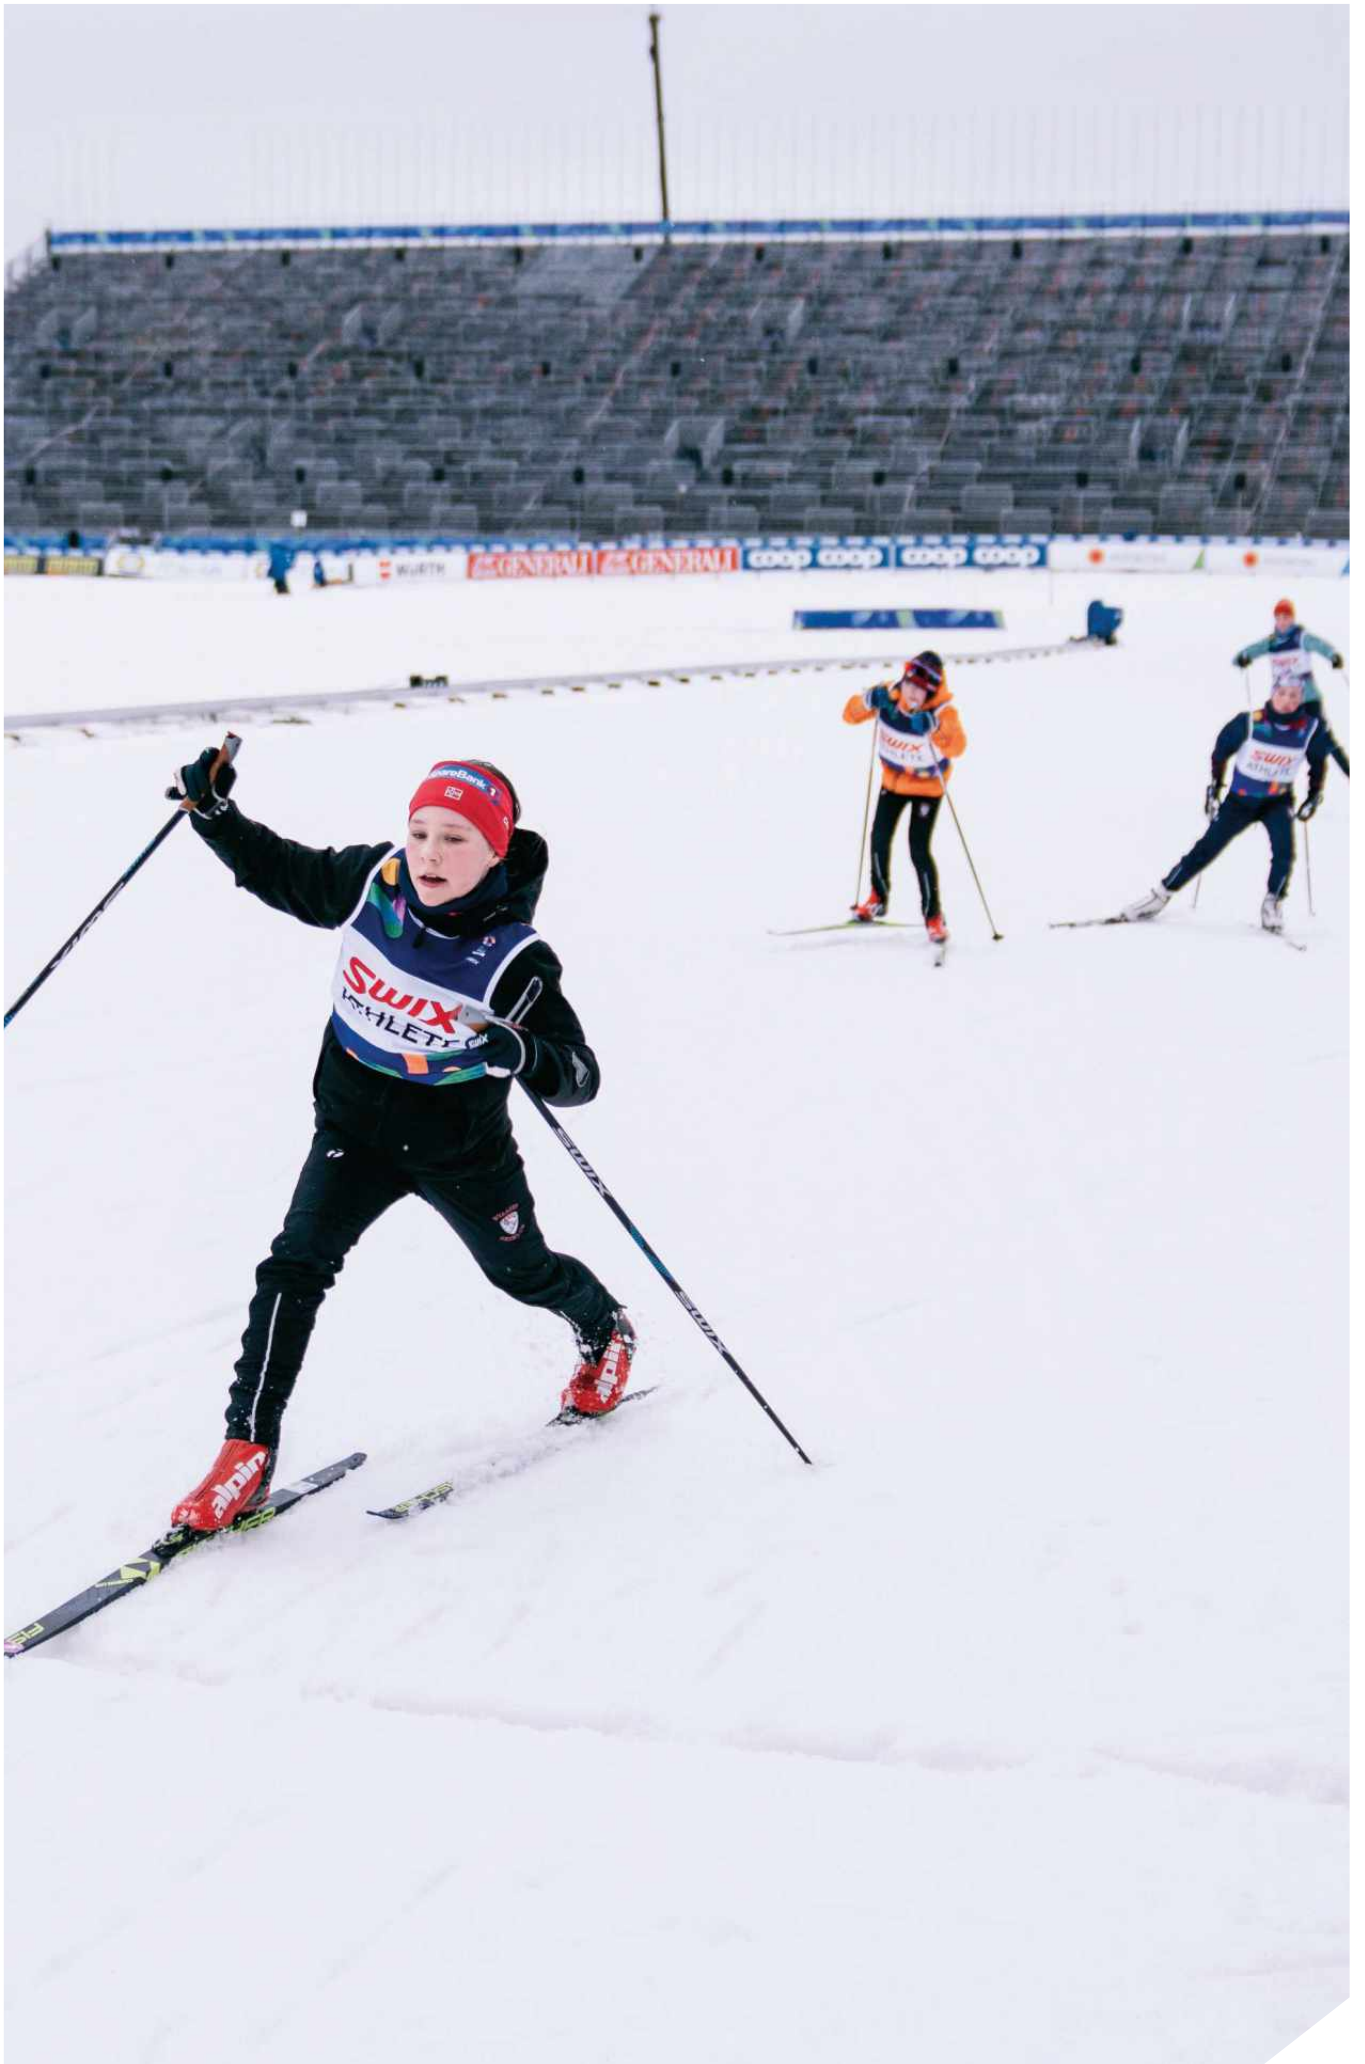

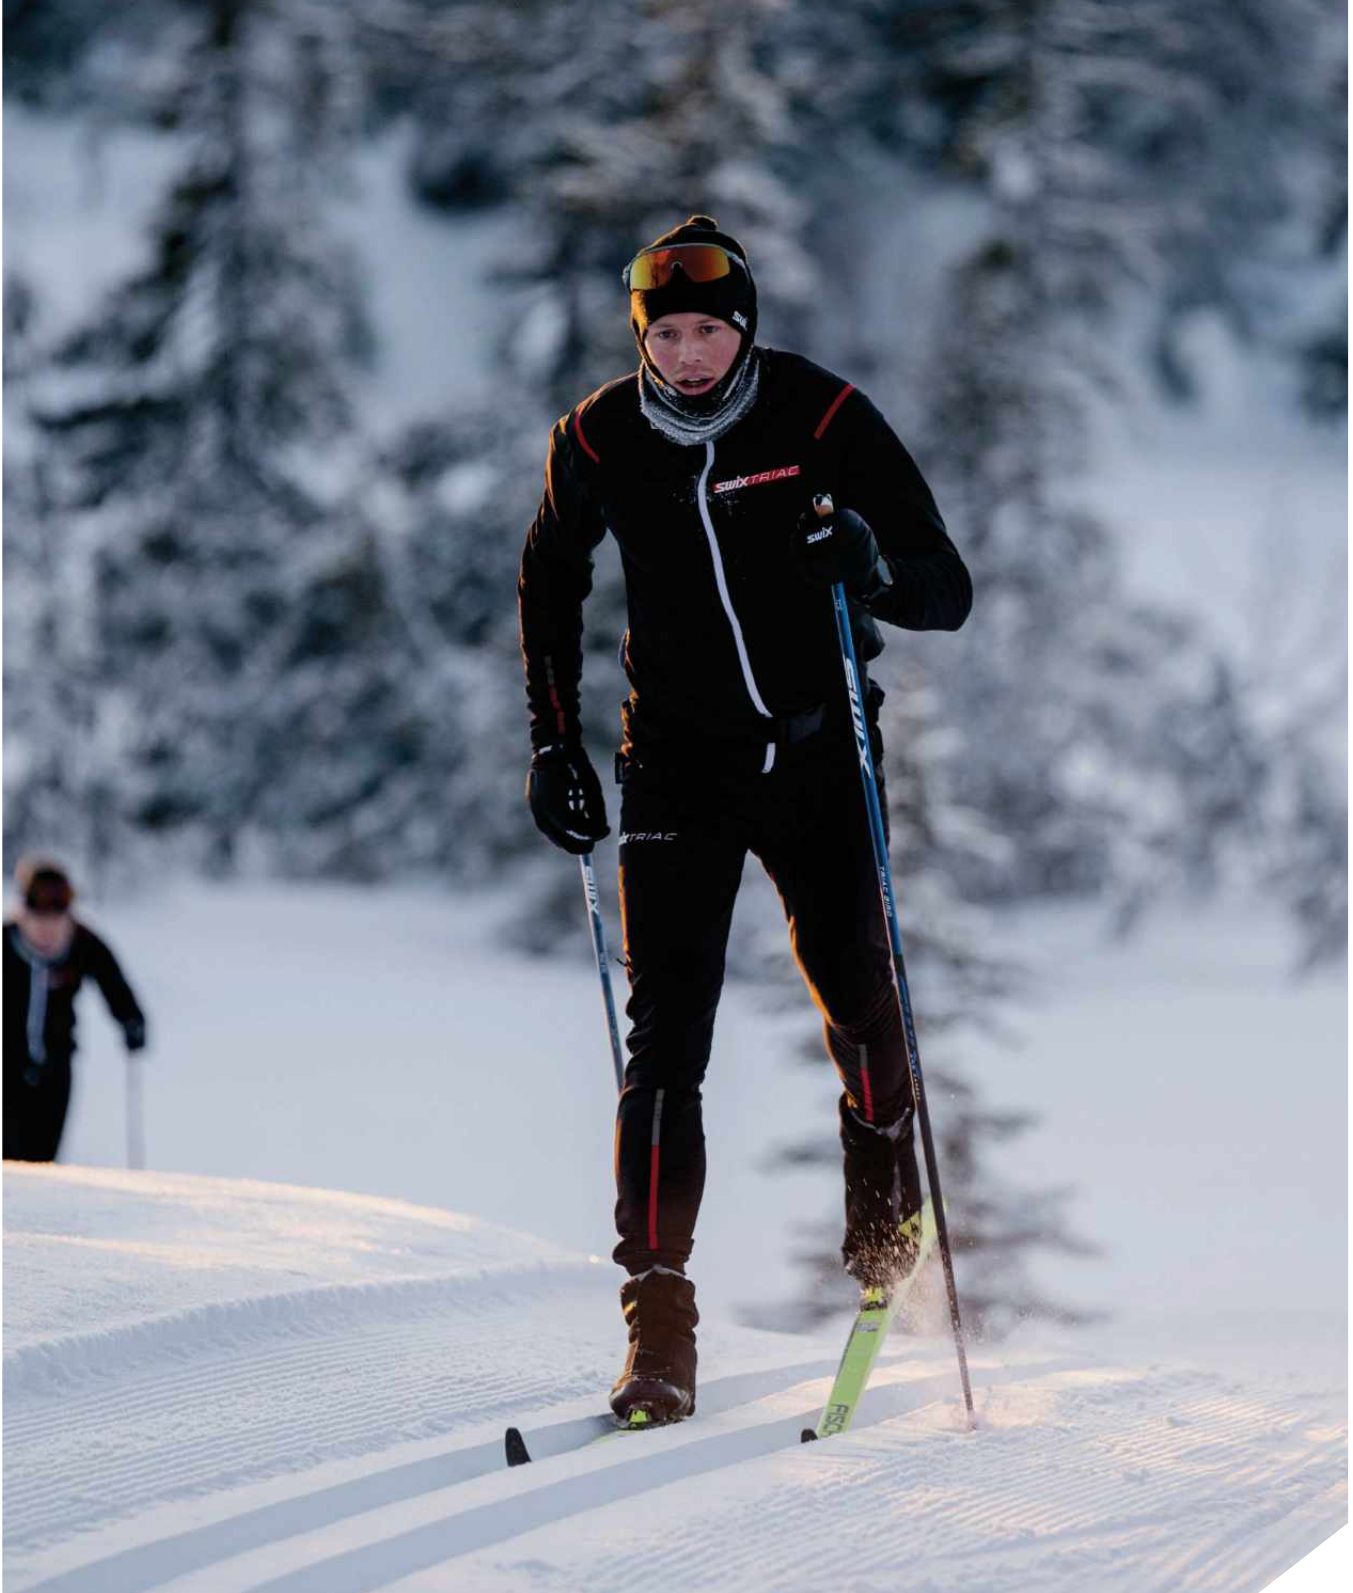

JLF304-00 Snowpath Junior Pole

JLF304-00 1 pair

Handle 13 mm, basket 13 mm
Size Range: 70 cm - 105 cm. 5 cm Interval
Recommended use: Wherever there is snow

Aluminum pole for the youngest ones. The pole comes with the ergonomic children's handle and easy adjustable straps. For safety, the ferrule is made of thermoplastics and has a tip with rounded shape. Large basket prevents the pole from sinking deep into soft snow.

Spare Parts

Our spare parts are made to suit all conditions and needs. We have developed our own systems; TCS and TBS, which make changing pulleys and straps easy and fast.

Baskets

Triac Basket System
Easy exchange of baskets.

Pendulum TBS Basket Kit. Lightweight basket kit for TBS system, including lightweight baskets such as Leaf pendulum, paw pendulum and carbon claw.

TBS Guide	Loose Snow	Medium Hard Snow	Very Hard Snow
Carbon Claw	-	**	***
Carbon Leaf Carbon Leaf Pendelum	**	***	**
Carbon Paw / 97T Carbon Paw Pendelum	***	**	-

Loose snow: You easily sink down while walking on the snow surface.

Medium hard snow: Your shoe makes a clear imprint in the snow, not sink in more than approx. 10 mm.

Very hard snow: Adult's foot leaves slight or no impression on snow.

Handles

Triac Connection System
 Revolutionary power
 transmission between hand
 and shaft.

All baskets, straps and
 handles are sold in pairs!

XSHFC-TA16
Force Handle Aero Cork TCS

XSHFC-TA16 1 pair

A stronger handle that ensures all the force applied, goes directly into the pole with no energy leakage. The handle is reinforced in the areas that experience the most pressure, providing immediate response. The outer layer is made of natural cork, offering a comfortable grip with excellent insulation. Fits the Aero shafts.

XSHFC-TC16
Force Handle Circular Cork TCS

XSHFC-TC16 1 pair

A stronger handle that ensures all the force applied, goes directly into the pole with no energy leakage. The handle is reinforced in the areas that experience the most pressure, providing immediate response. The outer layer is made of natural cork, offering a comfortable grip with excellent insulation. Fits the circular shafts.

XSHFR-TA16
Force Handle Aero Rubber TCS

XSHFR-TA16 1 pair

A stronger handle that ensures all the force applied goes directly into the pole with no energy leakage. The handle is reinforced in the areas that experience the most pressure, providing immediate response. The outer layer is made of durable rubber, offering a comfortable and long-lasting grip, ideal for tough conditions. Fits the Aero shafts.

XSHFR-TC16
Force Handle Circular Rubber TCS

XSHFR-TC16 1 pair

A stronger handle that ensures all the force applied goes directly into the pole with no energy leakage. The handle is reinforced in the areas that experience the most pressure, providing immediate response.  handles are sold in pairs!

XSSR1-GT Racing Glove Strap TCS

XSSR1-GT 1 pair

The Racing Strap TCS is our top-of-the-line model, engineered for those who demand the highest performance. This strap delivers maximum power transfer and precision fit. Crafted with a durable nylon outer layer and a breathable 3D-mesh interior, the Racing Strap TCS ensures comfort without compromise. The design eliminates stretch and hard spots, giving you a secure, consistent feel with every push. The innovative quick-release function allows you to easily detach and reattach the strap during your ski trip, whether you need to take a quick break or use your phone without any hassle. Compatible with all our poles featuring the TCS system.

XSSR2-GT Racing Slim Glove Strap TCS

XSSR2-GT 1 pair

The Racing Slim Strap TCS is tailored for athletes seeking a more refined, slimmer fit. This version offers the same high-performance qualities as the Racing Strap TCS, with a narrow profile for improved comfort and control for those with smaller hands. The innovative quick-release function allows you to easily detach and reattach the strap during your ski trip, whether you need to take a quick break or use your phone without any hassle. Compatible with all our poles featuring the TCS system.

XSSP1-GT Performance Glove Strap TCS

XSSP1-GT 1 pair

The Performance Glove Strap TCS is designed for dedicated skiers who value both performance and comfort on the trails. Positioned just below our racing models, this strap provides excellent power transmission while ensuring all-day comfort, making it ideal for avid enthusiasts. With its soft and durable materials, the Performance Glove Strap offers a secure, ergonomic fit that adapts perfectly to your hand. The innovative quick-release function allows you to easily detach and reattach the strap during your ski trip, whether you need to take a quick break or use your phone without any hassle. Compatible with all our poles featuring the TCS system.

XSSP3-LT Performance Loop Strap TCS

XSSP3-LT 1 pair

A versatile and comfortable strap designed specifically for Swix's TCS system. This strap combines the traditional loop with modern adjustability, allowing you to wear mittens without sacrificing control or comfort. Quick-release function and compatible with all our poles featuring the TCS system.

**XSST1-GT
Touring Glove Strap TCS**

XSST1-GT 1 pair

Simple and effective solution for skiers seeking comfort and functionality. Built with a durable nylon outer layer and soft 3D-mesh interior, this strap ensures no stretch and eliminates pressure points for a smooth, comfortable fit. The innovative quick-release function allows you to easily detach and reattach the strap during your ski trip, whether you need to take a quick break or use your phone without any hassle. Compatible with all our poles featuring the TCS system.

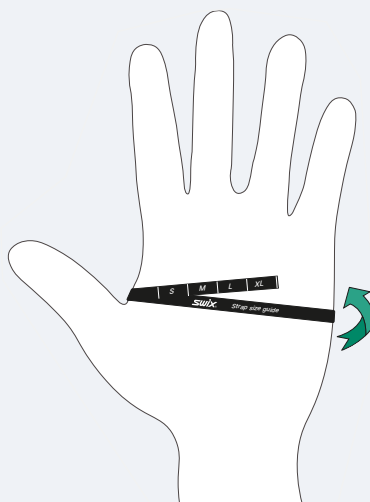

**XSST2-LT
Touring Loop Strap TCS**

XSST1-GT 1 pair

Simple and functional design that fits perfectly with Swix's TCS system. This strap provides comfort and ease of use, making it perfect for skiers who prioritize a smooth, leisurely experience while still enjoying reliable support. Quick-release function and compatible with all our poles featuring the TCS system.

XS	140-165
S	165-190
M	190-215
L	215-240
XL	240-265
XXL	265-290

Strap size guide

Cut off the ribbon to the right on this page. Place the ribbon around the hand as close to the thumb as possible. You find the recommended strap size where the white half-arrow meets the ribbon. Measure without wearing gloves. This strap size recommendation is correct when wearing race style gloves. If you will be wearing thicker gloves we suggest going up one strap size.

Upper Tube for MT312, with trekking handle and locking ring.

**RDXMT3L
MT312 Lower Tube**

RDXMT3L 1 pcs

Lower tube for MT312, with ferulle

Locking system

- Easy to fix, easy to open, 100% reliable!
- No extra adjustments needed after usage.
- High performance aluminum fixation screw for better traction and comfort.
- Easy maintenance. Few parts and easy access, no tools needed.

Handle and strap

- The strap attachment secures easy adjustment/replacement of straps (Patent pending).
- Multipurpose handle – ski scraper, tech-binding hook.
- Multifunction strap – fast fixation and adjustments, continues loop adjustment, adjustable padding.
- The handle has a contour shape for a more relaxed and comfortable feeling.

Basket system

- The Sonic basket system is inter-changeable.
- Super lightweight, optimum support against the snow.
- Excellent pendulum properties.

Pole Sizing

Started in FW22/23, we implemented a new reference for measuring pole length. One very important consequence of this change is that the length printed on the poles does not correspond to the same actual pole length as previous poles from SWIX.

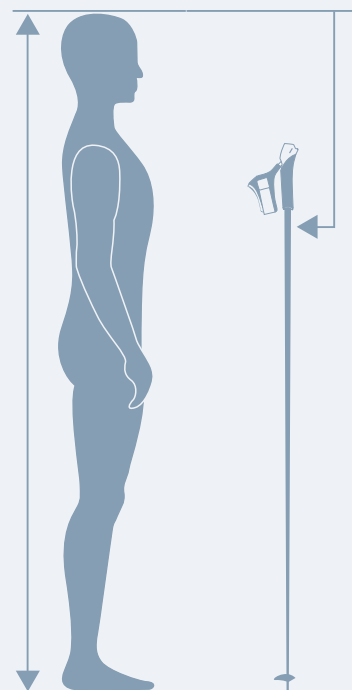

The difference between the old and the new length measurement systems is illustrated in the figures below. The closest matching pole lengths according to the new length system compared to the old pole lengths are listed in the table below. The change will affect almost all cross country poles. Look for the tag which indicates that the new pole lengths apply.

The two main reasons for changing the measurement system are:

1. The length printed on the pole will reflect effective pole length and be correct regardless of which handle is mounted on the pole.
2. The new measurement system is equal to the way poles are measured according to the regulations defined by the international ski federation (FIS).

SWIX pole length recommendations

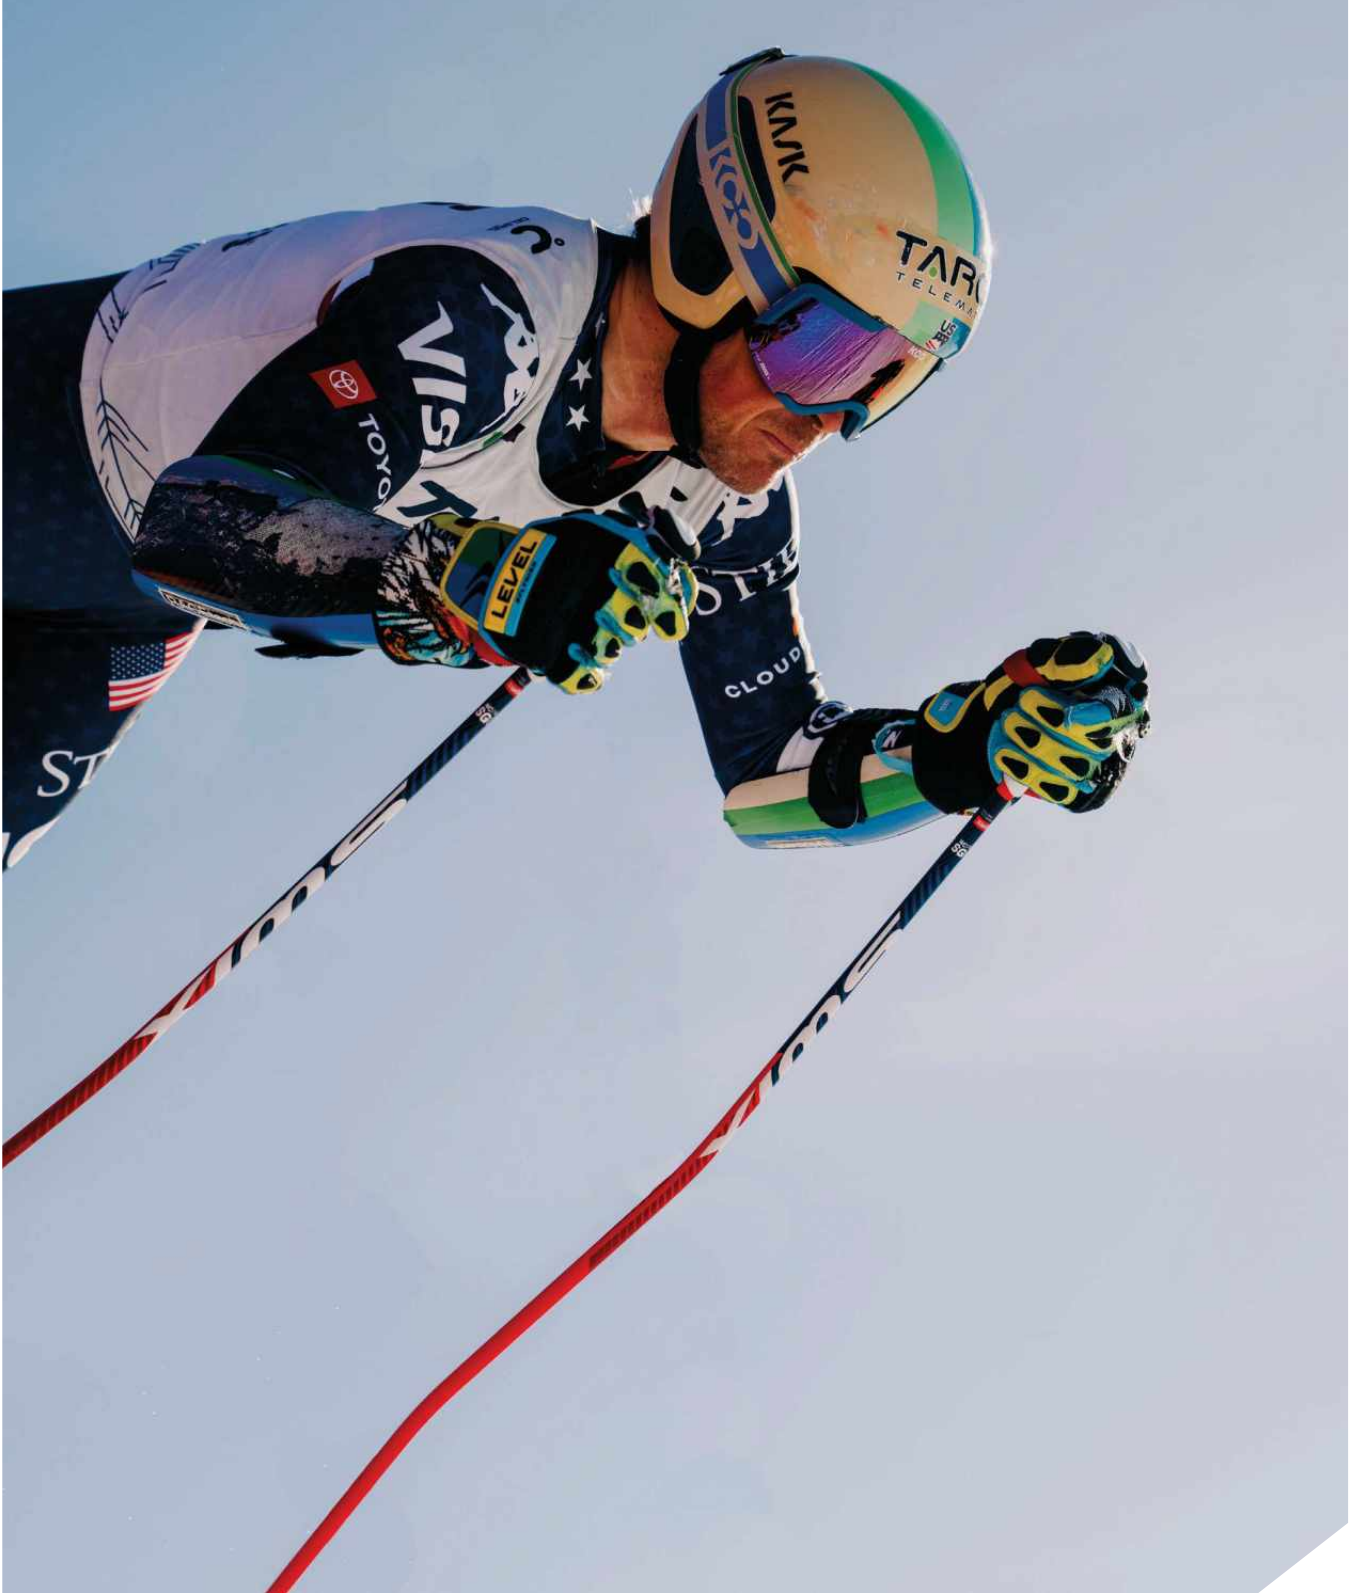

Body length barefoot (cm)	Pole length classic (cm)	Pole length skating (cm)
160.0	125.0	135.0
162.5	127.5	137.5
165.0	130.0	140.0
167.5	132.5	142.5
170.0	135.0	145.0
172.5	137.5	147.5
175.0	140.0	150.0
177.5	142.5	152.5
180.0	145.0	155.0
182.5	147.5	157.5
185.0	150.0	160.0
187.5	152.5	162.5
190.0	155.0	165.0
192.5	157.5	167.5
195.0	160.0	170.0
197.5	162.5	172.5
200	165.0	175.0

SWIX childrens pole length recommendations

Recommended pole length for children and juniors are a bit longer than for senior due to ski technique.

Body length barefoot (cm)	Pole length classic (cm)	Pole length skating (cm)

150	125	135
155	130	140

Alpine poles

A premium collection of ski poles crafted for alpine skiing, from top-level racers to passionate enthusiasts. Engineered with high-quality materials and cutting-edge technology, the Alpine series ensures superior performance and durability.

Racing Composite

AC105-00 World Cup Pro Slalom

AC105-00 1 pair

Handle 13,3 mm, ferrule 10 mm

Size Range: 110 cm - 135 cm. 5 cm Interval

Recommended use: Competition

An uncompromising carbon alpine ski pole where we have focused on optimal balance, pendulum, fracture strength, weight and stiffness.

AC115-00 World Cup Pro Super G

AC115-00 1 pair

Handle 13.3 mm, ferrule 10 mm

Size Range: 115 cm - 140 cm. 5 cm Interval

Recommended use: Competition

An uncompromising carbon ski pole where we have focused on optimal balance, pendulum, fracture strength, weight and stiffness. Also used by some ski racers for giant slalom.

AC125-00 World Cup Pro Downhill

AC125-00 1 pair

Handle 13.3 mm, ferrule 10 mm

Size Range: 125 cm - 140 cm. 5 cm Interval

Recommended use: Competition

An uncompromising carbon alpine ski pole where we have focused on optimal balance, pendulum, fracture strength, weight and stiffness. The pole is three times stiffer than the equivalent pole in aluminum. This contributes to a more instantaneous and explosive starting phase.

Racing Aluminum

FA105-00 World Cup Pro Slalom

FA105-00 1 pair

Handle 18 mm, ferrule 10 mm
Size Range: 110 cm - 135 cm. 5 cm Interval
Recommended use: Competition

An uncompromising carbon ski pole where we have focused on optimal balance, pendulum, fracture strength, weight and stiffness. Also used by some ski racers for giant slalom.

FA115-00 World Cup Pro Super G

FA115-00 1 pair

Handle 18 mm, ferrule 10 mm
Size Range: 110 cm - 135 cm. 5 cm Interval
Recommended use: Competition

Top racing ski pole in aluminum with super-G bend. Downhill racing handle and basket.

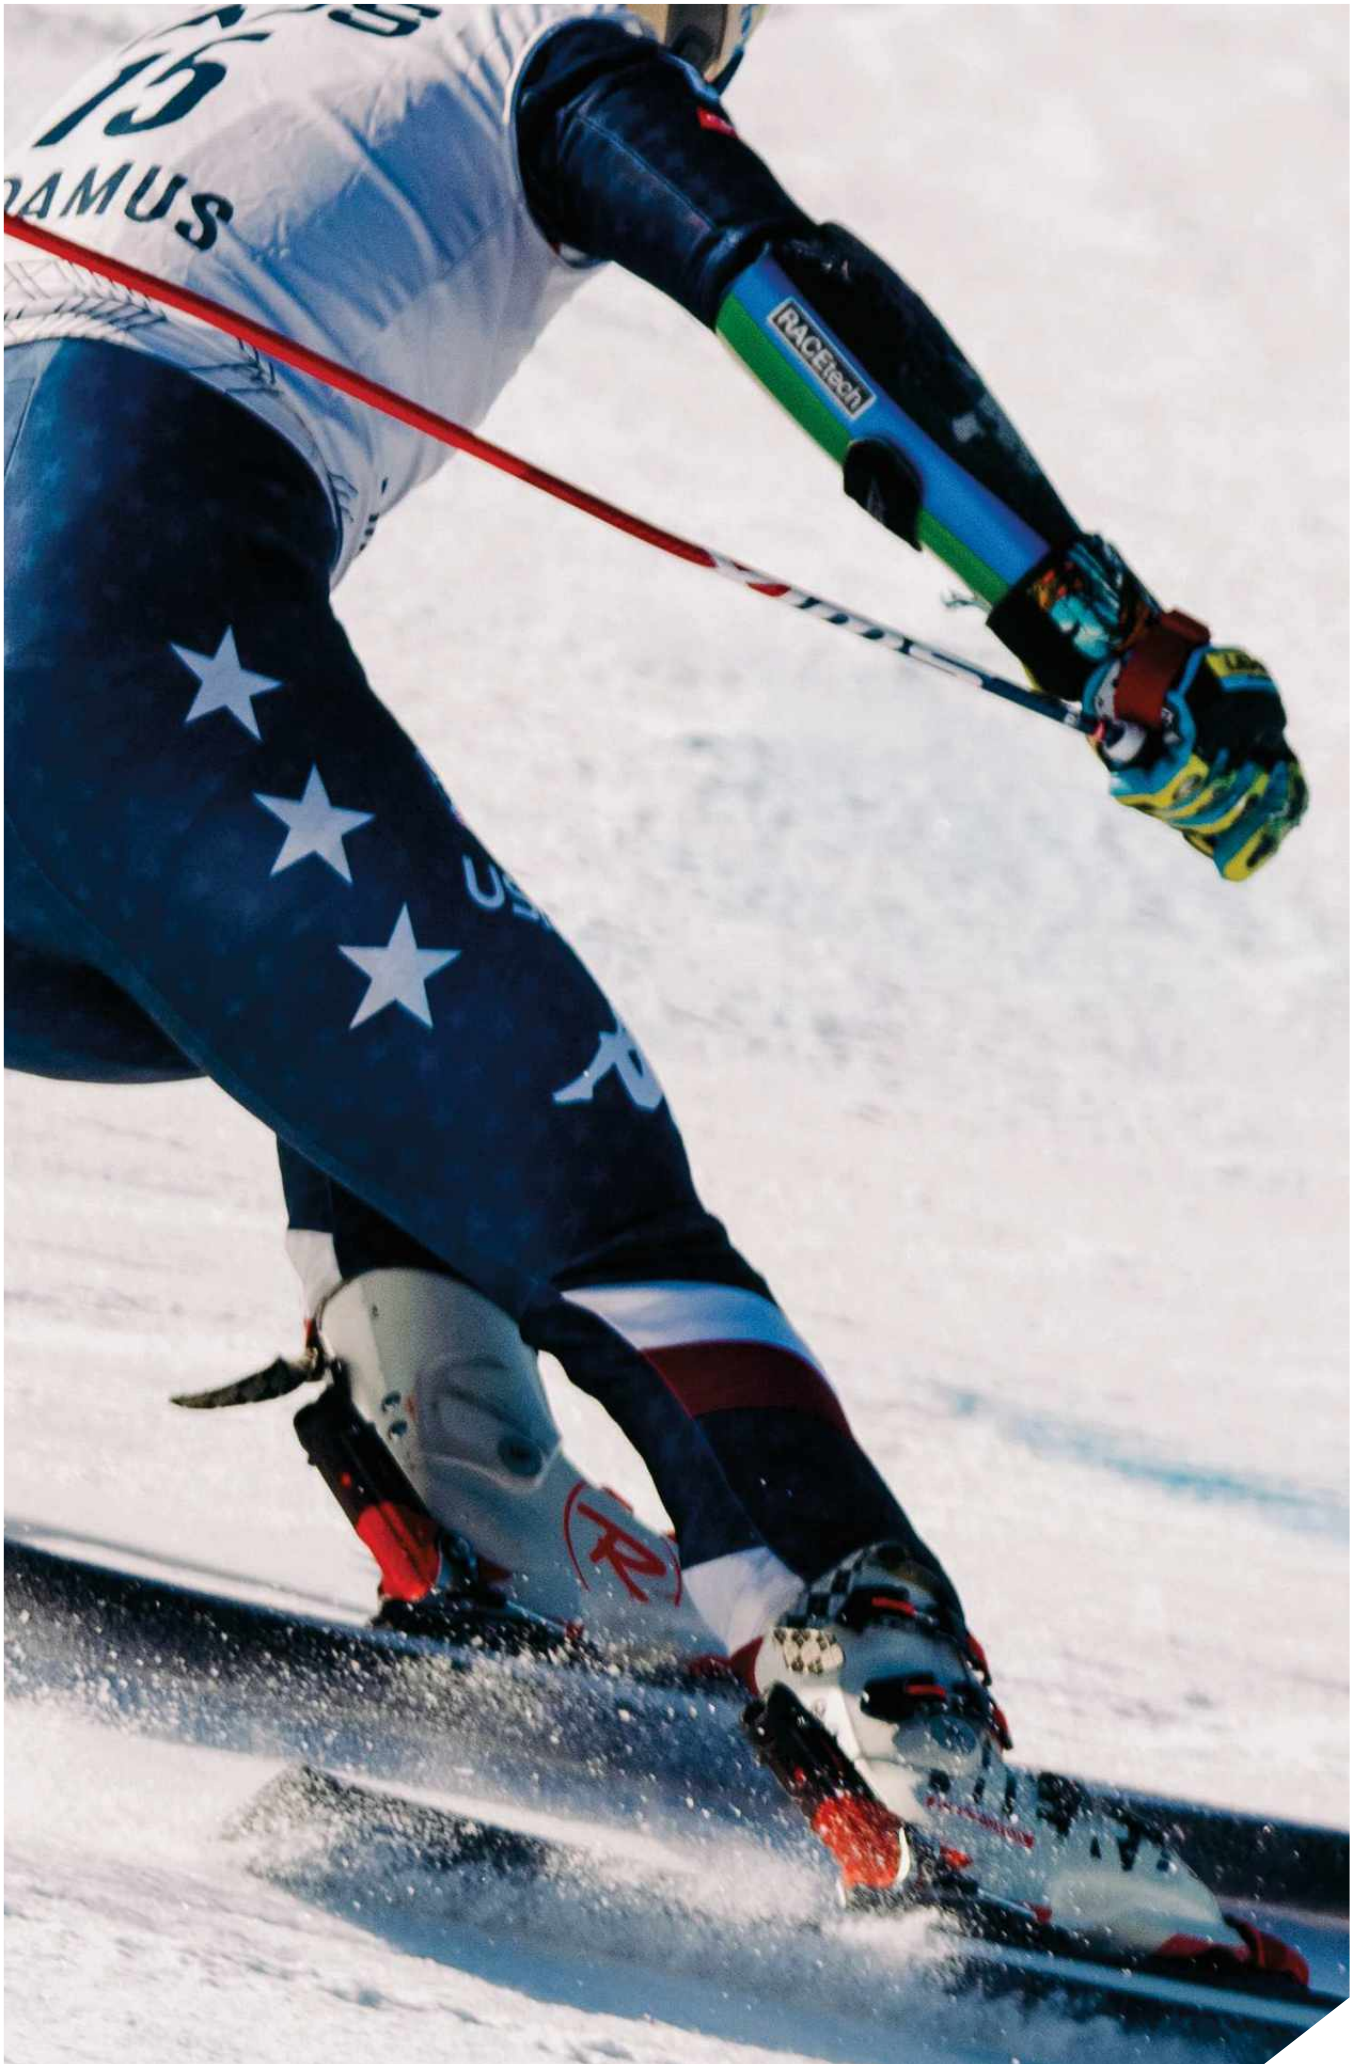

FA125-00 World Cup Pro Downhill

FA125-00 1 pair

Handle 18 mm, ferrule 10 mm
Size Range: 110 cm - 135 cm. 5 cm Interval
Recommended use: Competition

Top racing ski pole in aluminum with downhill bend. Downhill racing handle and basket.

Blackline

25009-23 Blackline Stingray Pole Carbon

25009-23 1 pair

Handle 14 mm, ferrule 10 mm
Size Range: 110 cm. 135 cm. 5 cm Interval
Recommended use: Alpine Skiing

The Blackline Carbon pole is dedicated to the expert skier who loves steep and demanding slopes. The shaft is designed with high stiffness, impact strength, and excellent pendulum properties. The hand fits perfectly in the DD4 handle, with a patented ADD Tab system and an alpine racing basket.

Redline

25010-23 Redline Phoenix Pole Carbon

25010-23-10000 1 pair
25010-23-90000 1 pair

Handle 14 mm, ferrule 10 mm
Size Range: 100 cm. 135 cm. 5 cm Interval
Recommended use: Alpine Skiing

Redline is a high-performance pole built for speed. The shaft is developed focusing on impact strength, balance, and stiffness. DD4 handle for a perfect grip with our patented Add Tab. This is a premium alpine poles for the skilled skier.

25012-23-90000 Redline Phoenix Pole Aluminium

25012-23-90000 1 pair

Handle 14 mm, ferrule 10 mm
Size Range: 110 cm. 135 cm. 5 cm Interval
Recommended use: Alpine Skiing

The Blackline Carbon pole is dedicated to the expert skier who loves steep and demanding slopes. The shaft is designed with high stiffness, impact strength, and excellent pendulum properties. The hand fits perfectly in the DD4 handle, with a patented ADD Tab system and an alpine racing basket.

Whiteline

25013-23 Whiteline Leopard Pole

25013-23 1 pair

Handle 16 mm, fixed ferrule
Size Range: 110 cm-135 cm. 5 cm Interval
Recommended use: Alpine Skiing

The Whiteline pole is a new alpine pole in aluminum for the early intermediate skier. DD4 handle and durable baskets.

Blueline

25015-23 Blueline Barracuda Pole

25015-23 1 pair

Handle 16 mm, fixed ferrule
Size Range: 110 cm-135 cm. 5 cm Interval
Recommended use: Alpine Skiing

The Blueline pole is a new alpine pole in aluminum for the early intermediate skier. DD4 handle and durable baskets.

Greenline

25017-23 Greenline Mamba Pole

25017-23 1 pair

Handle 16 mm, fixed ferrule
Size Range: 110 cm-135 cm. 5 cm Interval
Recommended use: Alpine Skiing

The Greenline pole is a great choice for a wide range of alpine skiing. The shaft is based on quality aluminum with functional components. Ergonomically designed handle and basket for various conditions. Cleandesign that matches a wide range of ski equipment and clothes.

Junior

JA105-00 WC PRO JR SL

JA105-00 1 pair

Handle 16 mm, ferrule 10 mm
Size Range: 95 cm - 115 cm. 5 cm Interval
Recommended use: Junior Competition

Junior slalom pole in the best aluminum alloy withstanding rough usage in slopes and gates. Comes with DD5 handle with SWIX Add tab and small racing baskets, same as our top racing poles.

JA115-00 WC PRO JR SG

JA115-00 1 pair

Handle 16 mm, ferrule 10 mm
Size Range: 95 cm - 115 cm. 5 cm Interval
Recommended use: Junior Competition

Junior Super G pole in the best aluminum alloy withstanding rough usage in slopes and gates. Comes with DD5 handle and downhill baskets, same as our top racing poles.

25014-23 Blueline Barracuda Pole Junior

25014-23 1 pair

Handle 16 mm, fixed ferrule
Size Range: 80 cm - 105 cm. 5 cm Interval
Recommended use: Alpine Skiing

Junior pole in durable aluminum, featuring the SWIX DD5 handle. Perfect for juniors that want to improve their skiing skills.

25016-23
Greenline Mamba Pole Junior

25016-23

1 pair

Handle 16 mm, fixed ferrule

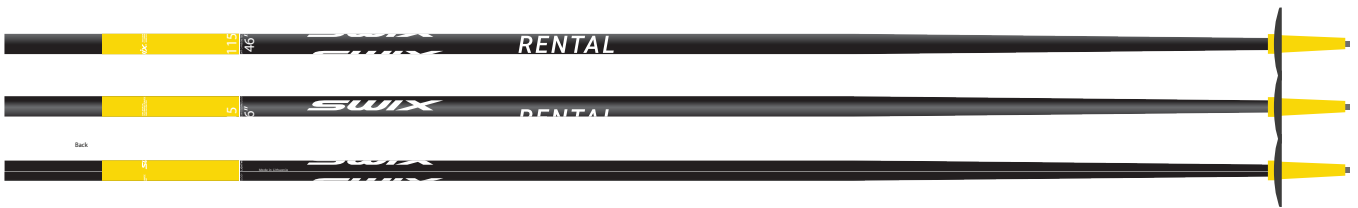

Size Range: 80 cm -105 cm. 5 cm Interval

Recommended use: Alpine Skiing

Aluminum alpine pole for the youngest ones. The Greenline Junior pole is an excellent choice for beginners, with high strength and impact properties.

Rental

25020-23 Rental Classic Pole Composite

25020-23 1 pair

Recommended use: Alpine Skiing

Rental Classic Pole Composite is reinforced to withstand the most demanding usage and is almost unbreakable. Comes with an ergonomically designed handle and durable basket and ferrule. Color coded designs on shaft and basket.

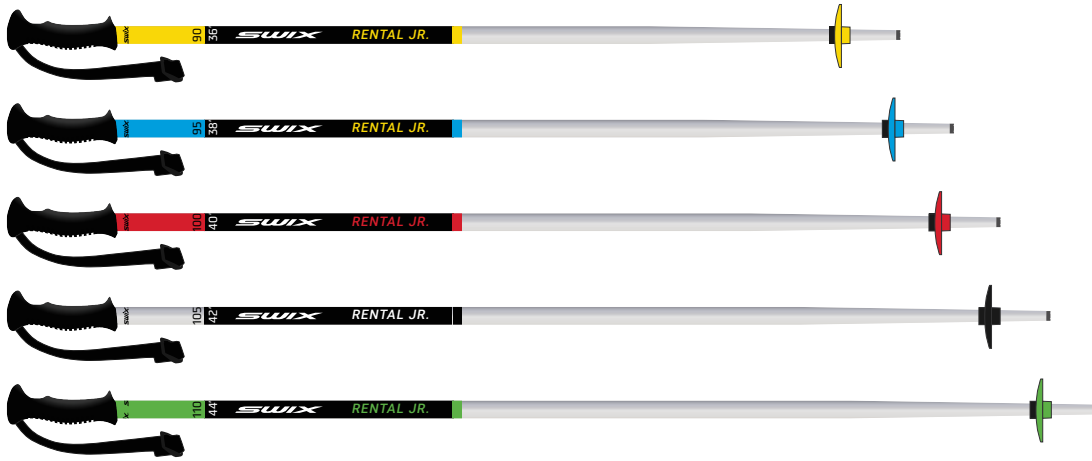

25019-23 Rental Classic Pole

25019-23 1 pair
